

HOW MUCH COCONUT OIL SHOULD I GIVE MY DOG?

Start with 1/4 teaspoon for small dogs & puppies | 1 teaspoon for large dogs

AFTER YOU'VE LET THEIR BODIES ADJUST:

About 1 teaspoon daily **per 10 lbs** of body weight

1 TSP

Or about 1 tablespoon **per 30 lbs**

1 TBSP

Dogs need time to adjust to the addition to their diet. Lessen the amount if your dog has diarrhea or greasy stools.
