INSTALLATION

Please contact your local British Fires dealer for more information.

// NEW FOREST 48" ELECTRIC FIRE

INSTALLATION OPTIONS

// THREE-SIDED

VARIATION 1

A three-sided offers a sleek design, contemporary in style with clean lines and 180° view of the fuel bed and dancing flames.

// FULLY RECESSED

VARIATION 2

Fully Recessed creates a more prominent face-on view both sides can be covered by fully-recessing the fire into the chimney breast. This installation method adds perceived width to any room.

// TWO-SIDED

VARIATION 3

Cornered is the option to have only one side covered up and installed into a corner section of a room where this style would suit. This can be done with either the left or right side of the fire to be covered — creating a more dramatic room composition.
