## Ring Size Guide

Start by printing this page in US letter paper size ( $8.5^{\prime \prime} \times 1 l^{\prime \prime}$ ).
Use the scale checker with a ruler to make sure the page is printed correctly. It should measure 2 cm on both directions.

## Measuring Paper

1. Cut out the ring measuring paper.
2. Insert the point on the whole you cut inside the measuring paper.
3. Wrap the ring measuring paper around the finger you want to measure. Make sure you wrap it on the thickkest part of the finger, not at the end.
4. Write down the number that appears above "this is your size".

## Measuring An Existing Ring

1. Place the ring over each circle until the ring lines up with the outside of the circle. Make sure that the outside of circle is touching the inside of the ring and you can see the outline of the circle inside the ring.
2. To double check on the fit, take a pencil to trace the inside of the ring against the selected circle. The two circles should match.
3. The correct ring size is the number inside the chart.

**NOTE: This is only meant to be a guide, it is not a $100 \%$ accurate way of sizing yourself.
