

TAFF MOUNT PART# 15-187

This mounting kit has been designed for use with your Dickinson BBQ. It will fit the following products:

- Sea-B-Que Small
- Sea-B-Que Large
- Sea-B-Que Round
- Spitfire 180 Grill

While this BBQ mount is a very strong and durable mount, it is not recommended to leave the Bar-B-Que attached to the mount whilst underway, especially in rough seas. It is recommended to remove the BBQ whenever the boat is moving as the mount could shake loose from the sockets in choppy water

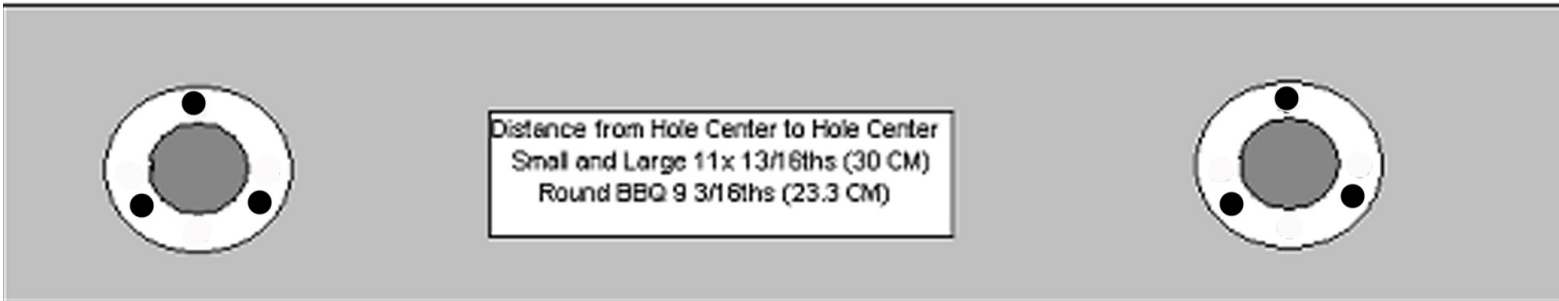

Included Parts

- 2 x Socket
- 2 x Stanchion
- 2 x Side Brackets
- 4 x 10-32 x 3/8 Screw
- 4 x 10-32 Hex Nuts
- 6 x #12 x 3/4 Wood Screw
- 1 x Instructions

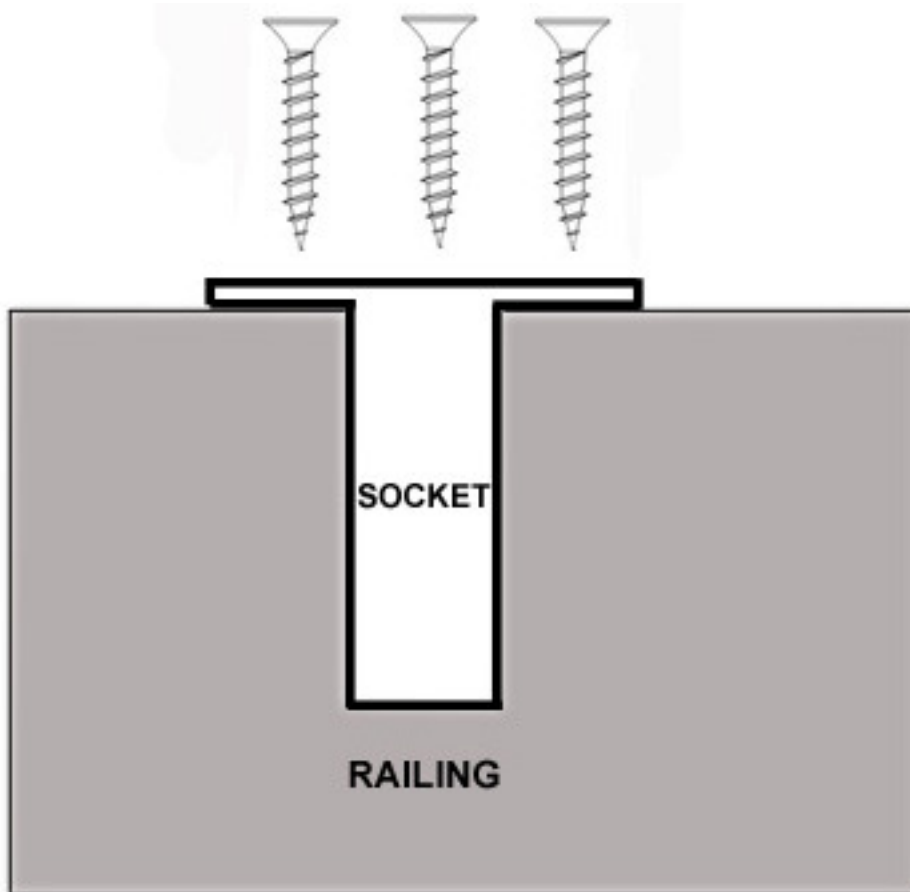

Instructions for Use

Installing the Sockets

1. Drill out the holes where the sockets will be located. The sockets are 1" in diameter so the hole needs to accommodate this. The distance between the holes will vary depending on which BBQ you have. 11 13/16" center to center for the Large, Small Sea-B-Ques and the Spitfire180 and 9 3/16" for the round BBQ

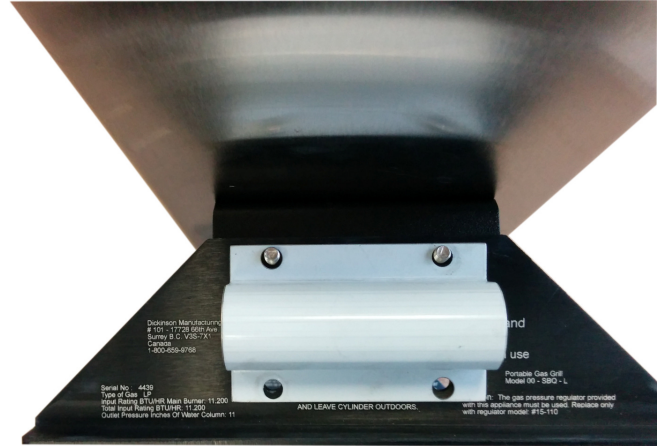

2. Once the holes are drilled insert the sockets and secure them to the rail with the 6 #12 x 3/4" wood screws

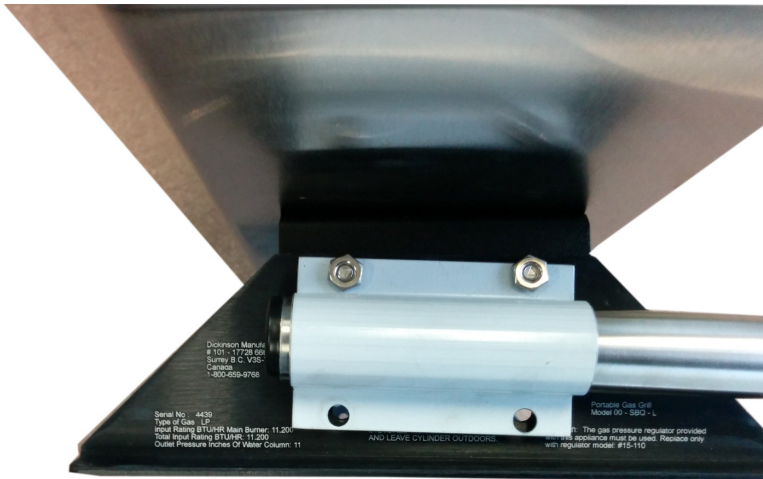

Attaching the Mount to the BBQ

1. Undo the nuts holding on the legs of your Sea-B-Que
2. Place the bracket over the bolts coming through the legs

3. Place the lock washers and nuts over the top of the bracket and slide the stanchion into the bracket (plugged hole slides into brackets)
4. Thread the 10-32 x 3/8" screws through the lower holes in the legs and through the brackets
5. Place the 10-32 nuts onto the screws and tighten all nuts once desired position on the stanchion is achieved

6. Drop the other end of the stanchions into the sockets in the rail and enjoy your BBQ
