The 2 Burner Drop In Cook Top has a heavy duty stainless steel construction which will stand up to the rigors of any marine environment. The powerful "triple style" burner boasts 11000 BTU's and along with a smaller 7000 BTU burner you will be able to tackle any type of cooking you desire. Furthermore with the removable cutting board, this unit has been carefully designed to meet all your cooking needs. It is a simple solution for on board cooking

We have taken every aspect into consideration in the construction of the 2 Burner Drop In. Both burners have automatic electronic spark ignition powered by a 9V battery box. Also each burner has individual thermocouple flame out protection for safety. The recessed cooking grill and adjustable pot holders ensure that no food will slide off the cooking surface in rough weather and the easy remove grill and interior make cleaning a breeze.
