

## BBQ Burner Replacement Instructions

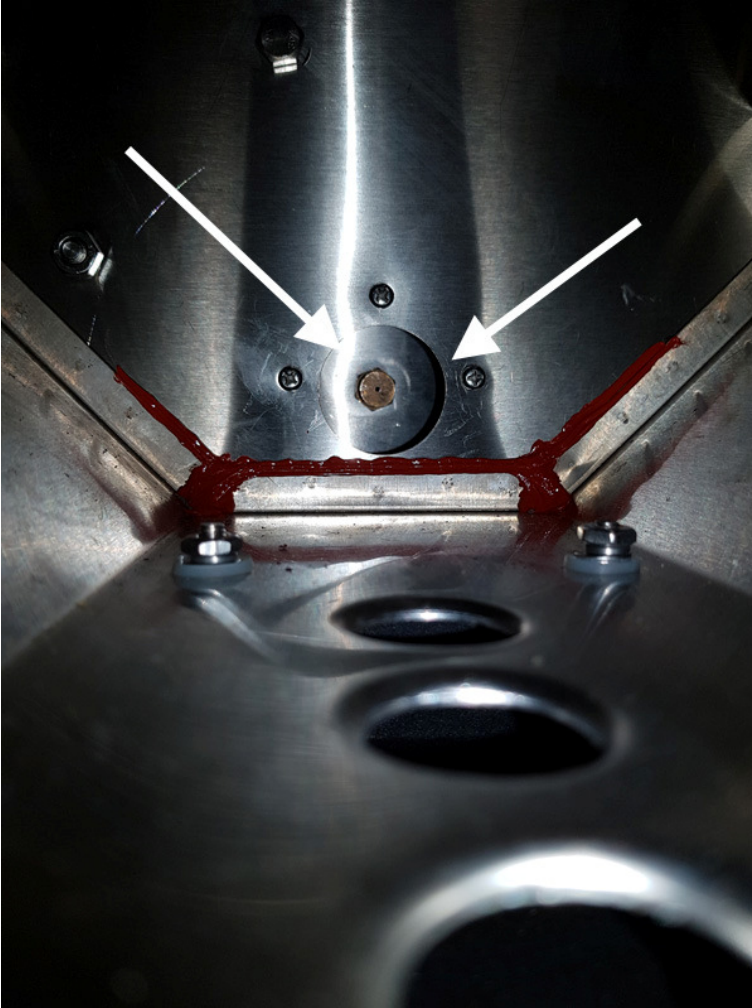

1. Remove the cooking grills
2. Undo the nut holding the burner to the mounting bracket

3. Pull the burner to the left and up to remove.

4. Slide the new burner in the same way. Make sure the opening on the end of the burner slides around the fitting inside the regulator box. It may be tight but you can reach underneath the regulator box to help guide the burner in.

5. Place the left end of the burner over the exposed screw, tighten the nut back and replace the grills.
