| Sea Rail | 26-021 |
| Oven rack | 26-050 |

The Caribbean 2 Burner Propane stove has a heavy duty stainless steel construction which will stand up to the rigors of any marine environment. The powerful "triple style" burner boasts 11000 BTU's and along with a smaller 7000 BTU burner you will be able to tackle any type of cooking you desire. The thermostatically controlled oven has over 1600 cubic inches of cooking space as well as an open flame broiler good for crisping up some garlic bread or melting cheese over anything from nacho's to bagels. Furthermore with the removable cutting board, this unit has been carefully designed to meet all your cooking needs.

We have taken every aspect into consideration in the construction of the Caribbean. Every burner has automatic electronic spark ignition powered by a 9V battery box. Also each burner has individual thermocouple flame out protection for safety. The oven door is dual panel to allow for safe viewing of your food and the recessed cooking grill and adjustable pot holders ensure that no food will slide off the cooking surface in rough weather.
