ELEC DRAW: 12V, .4 AMPS

BLOWER FAN: 67 CFM

IGNITION: AA BATTERY

FUEL: PROPANE

PRESSURE: 11" WC

MAX CAPACITY: 230 SQ FT

BTU: 4700

ALTITUDE: UP TO 5000FT

**CLEARANCES: 21" ABOVE
6" BELOW
2" SIDES**

FEATURES:

DUAL HOT AIR VENTING

Both the top of the heater and the hot air vent will discharge hot air. With the blower fan off heat will emit from the top grill, and with fan on, heat will blow from the vent above the window.

HEAT ISOLATING BODY

The outer panels of the heater are configured to not conduct heat from the firebox within, minimizing burn risks from the outside of the appliance.

PUSH BUTTON LIGHTING

Pressing the button on the right side of the heater will activate the sparker inside the heater, quickly igniting the burner.
