3" DP Exhaust Cap	16-080
3" H Style Exhaust Cap	16-090
3" Flue Pipe Rain Lid	16-200
12" x 24" Wall Liner	25-000

The Newport Solid Fuel heater is a simply designed heater that is a great way to provide supplementary heat to your cabin. Capable of burning everything from coal to driftwood, our solid fuel heater is a versatile addition to any set up. It's stainless steel desing ensures durability and the large spring mounted door and removable ash try make it simple to use. Add to that, the replacable interior lining and the Solid Fuel will give you count- less years of trouble free heat.

The Newport Solid Fuel Heater requires a 3" chimney which must be at least 4ft in height and not exceed 8ft. For installations in windy areas, we have our barometric damper as well as our "H" style chimney cap to help avoid down drafts as well as keeping the draft conditions consistent. It is imerative that the burn chamber not be overfilled as too much fuel could lead to too much heat which could damage the inside of the heater.
