- 4 99112002 10mm x 1.5 Nylok nut PosiLink

MUSCLEbar™

POSI•Link™

12109100 Installation Instructions

*****This sway bar is designed to work with our upper StrongArms*****

1. Apply lubricant to the poly bushing, then slide it over the sway bar.
2. Place the sway bar frame bracket over the bushing. Bolt the sway bar to the frame using the 3/8" x 1 1/4" bolts, Nylok nut and flat washers supplied.

Note: Do not tighten the frame bolts until after the PosiLinks are installed.

3. Attach the 90 degree end of the PosiLink to the rear tab of the upper control arm using a 10mm Nylok nut and a 3/8" flat washer on each side of the tab.

4. Slide a T-bushing over the straight end of the PosiLink, then slide it through the sway bar. Another T-bushing will be installed on the bottom along with a 10mm Nylok nut.

5. The frame bolts can now be tightened.

6. Check sway bar and PosiLink clearance through full suspension travel.

7. Ensure that the PosiLinks do not bind through full suspension travel.
