Spill Kits in 240L Bins

Spill kits are required to contain, control and clean up spills of various different liquids. Our range of spill kits ensure you can quickly deal with spills when they occur. Failure to deal with spills correctly can result in environmental impacts, unclean work environments and slip hazards.

General purpose/chemical spill kits are designed for cleaning up chemical & general type spills. They absorb both water and oil based liquids. Oil & fuel spill kits absorb oils & fuels and repel water.

Order Code	Description
C240-GPKIT	240L General Purpose/Chemical Spill Kit
C240-GPKIT-R	Refill 240L General Purpose/Chemical Spill Kit
General Purpose/Chemical Spill Kits Include:	
7 x 3.0m Absorbent Minibooms	1 x Elbow Length PVC Gloves
100 x 410mm x 460mm Absorbent Pads	4 x Printed Disposal Bags
1 x 10kg Premium Floorsweep	1 x 240L Labelled Wheelie Bin
1 x Industrial Brush & Pan Set <i>(not included in Refills)</i>	
1 x Product Instruction Sheet	
C240-OFKIT	240L Oil & Fuel Spill Kit
C240-OFKIT-R	Refill for 240L Oil & Fuel Spill Kit
Oil & Fuel Spill Kits Include:	
2 x 3.0m Absorbent Minibooms	2 x Elbow Length PVC Gloves
2 x 1.2m Absorbent Minibooms	4 x Printed Disposal Bags
50 x 410mm x 460mm Absorbent Pads	1 x 240L Labelled Wheelie Bin
1 x 10kg Premium Floorsweep <i>(not included in Refills)</i>	
1 x Industrial Brush & Pan Set	1 x Product Instruction Sheet

Drum Dispensing System

Dispensing liquids out of 205L drums can be difficult and unsafe. This system allows you to dispense and store your 205L drums all in the one location, reducing storage area and saving time moving drums around. The stacking cradle allows you to store and dispense a total of 4 x 205L drums.

The dispenser base has a 'gutter' style surround helping to contain any leaks and direct them into the large 400L sump. The WLL of these 2 heavy duty units combined is 1350Kg.

Order Code	Description	Dimensions W x D x H (mm)	Capacity
CDDBY	Drum Dispenser Base – Fits 2 x 205L Drums	1350 x 1375 x 635	400L
CDDBC	Cradle – Suits Drum Dispenser Base – Fits 2 x 205L Drums	940 x 1375 x 390	

MAKE DISPENSING EASY

Poly Drum Dollies for 205L Drums

These drum dollies help make movement of drums around the workplace safer and easier.

Order Code	Description	Dimensions W x D x H (mm)
CPT205	Drum Dolly to move 1 x 205L Drum	760 x 760 x 290
CPT205H	Drum Dolly with Handle to move 1 x 205L Drum	760 x 860 x 1095 inc. Handle

WHY RISK A BACK INJURY?

205L Drum Trolley Dispenser

This drum trolley dispenser makes drum movement easy and the front bunded area allows decanting into smaller drums such as 20L drums.

Order Code	Description	Dimensions W x D x H (mm)	Capacity
C230PC	Poly Spill Trolley/Dispenser for 1 x 205L Drum	1740 x 815 x 680	250L

Beak Drum Lifter

- Blue powdercoat finish
- 350Kg capacity
- Lifts steel 205L drums and most plastic drums
- Includes safety chain to attach to forklift

Order Code	Description	Dimensions (mm)
CBDL-1	Beak Drum lifter	930 x 670 x 850

**ECONOMICAL
DRUM
HANDLING
SOLUTION**

Side Grip Drum Lifter

These drum lifters make handling of steel 205L drum safe and easy and allows operators to pickup drums without having to leave their seat. The drum is grabbed by pushing the arms against the drum and moving forward. The arms will lock under the drum rib when lifted. The more liquid in the drum, the more secure the grip will be. To place the drum in the required location lower the drum carefully and the arms will release once the drum is on the ground.

- Suitable for steel drums
- Allows precise placement of drums without leaving forklift seat
- 360Kg capacity
- Zinc plated finish
- Fork pocket size: 165 x 65 (LxW)
- Fork pocket centres: 325mm

Order Code	Description	Fork Pocket Centres	Fork Pocket Size (mm)
CSDL1	Side Grip Drum Lifter	325	165 x 65

Drum Secure Pallet System

This patented drum secure pallet system is another of our world first designs. The problem of securing drums on pallets and the time consuming strapping process every time 1 drum is pulled off a pallet has now been solved!

This heavy duty unit is extremely stable and can safely store and transport from 1-4 x 205L Drums at a time. The safety straps are easy to tighten and undo and ensure that the drums are safely secured.

- Eliminates drum strapping & wrapping issues
- Easy to strap & unstrap drums
- Powdercoat finish
- Available with or without a hardwood pallet
- Heavy duty stable design

Order Code	Description
C4DPH	4 Drum Holder without Pallet (includes Fixings)
C4DPH-TP	4 Drum Holder including 8 Board Hardwood Pallet

MAKE DRUM STORAGE SAFE & EASY

REDUCE HANDLING TIME

PATENTED WORLD FIRST DESIGN

Pallet Racking Drum Bund Pallet

Storing liquids in pallet racking can be unsafe and very messy if each pallet is not banded.

Metal bands are ideal for bunding combustible liquids such as oil.

Poly bands are ideal for containing many corrosive liquids such as batteries. An acid leak could cause severe damage to the integrity of the pallet racking structure!

Our pallet racking bands fit standard Australian sizes pallets with drums. With this fantastic bunding solution available there's no need to remain non-compliant!

Call us today on 1300 603 110 to discuss the best solution for your bunding storage requirements.

Order Code	Description	Dimensions W x D x H (mm)	Capacity
C4DBP-Z	Zinc Plated pallet racking drum bund	1240 x 1240 x 265	245
CDRBP	Poly pallet racking drum bund	1300 x 1300 x 260	250L

DO YOU COMPLY WITH BUNDING REQUIREMENTS?

PREVENT SPILLS ON OTHER PRODUCTS IN YOUR RACKS

Bunded Storeman® Longspan Shelving

This unique concept is fantastic for storage of drums in workshops, warehouses, shipping containers etc. These bunds are supplied complete with bungs for release of any spills that occur. The mesh shelves allow for any spilt liquid to easily drain directly into the sump. As each level is bunded you don't have the risk of liquid going over shelves on lower levels. Fast and easy to assemble and helps reduce the risk of messy and costly spills.

- Prevent messy spills
- Each shelf is individually bunded
- Powdercoat finish
- End frames supplied assembled for ease of installation

AVOID MESSY SPILLS

CATCHES DRUM LEAKS

CL6018SH-B	Extra Shelf to suit Bunded Longspan	1800L x 600D

ADD BAYS TO SUIT YOUR NEEDS

Lockable Bunded Storeman® Longspan Shelving

Lockable bunded longspan is a fantastic way to lock away your drums as well as keeping them bunded to catch any spills. This lockable shelving means you can regulate who has access to your drums, helping reduce pilfering and improve stock control.

This unit is ideal for workshops, warehouses, shipping containers etc. These bunds are supplied complete with bungs for release of any spills that occur. The mesh shelves allow for any spilt liquid to easily drain directly into the sump. As each level is bunded you don't have the risk of liquid going over shelves on lower levels. Optional weather cover available for outside use.

- Secure your stock
- Each shelf is individually bunded
- Padlockable
- Powdercoat finish
- Starter bays supplied assembled for ease of installation

**SHELVING DIMENSIONS INCLUDES FRAME
APPROX. SHELF AREA IS 1800MM LONG X 600MM WIDE**

LDPE Drip Tray

Drip trays are ideal for storage and containment of small quantities of liquids. These spill trays are also suitable for storage inside Containit Solutions range of pallet cages! Also great for workshops wanting to store oily parts whilst containing the small oil spills.

- Manufactured from LDPE
- 100L capacity

Order Code	Description	Dimensions W x D x H (mm)	Capacity
CMSC-DT	LDPE Drip Tray	1085 x 1085 x 100 High	100L

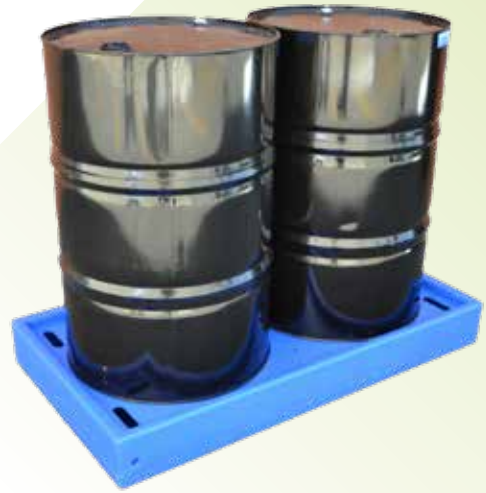

Low Profile Poly Bund Pallets

Low profile bunding is ideal where there are height constraints. These low bunds are also fantastic for applications where easy access to your drums is required such as pumping or filling of your drums. Their polyethylene construction makes them suitable for storage of many chemicals.

These bunds comply with bunding requirements when used correctly and can be joined together to provide greater sump capacity.

Order Code	Description	Dimensions W x D x H (mm)	Capacity
CLP-2DB	Low Profile Polyethylene 2 Drum Bund	1290 x 710 x 150	100L
CLP-4DPS	Low Profile Polyethylene 4 Drum Bund (Square)	1290 x 1290 x 150	190L
CLP-4DPR	Low Profile Polyethylene 4 Drum Bund (Rectangle)	2550 x 740 x 160	200L
CLP-RAMP	Ramp to suit Low Profile Polyethylene Bunding	810 x 1290 x 180	
CLP-CK	Low Profile Polyethylene Bund Connector Kit		

C2DBP-P

Bunding for 2 x 205L Drums

This range of bund pallets is designed specifically for storage of 2 x 205L drums. Correct storage of drums in workplaces is very important. Not only are bunds required for safety purposes and to comply with Australian Standards, spills are very messy and costly to cleanup. Don't risk a disruption in your workplace – Call us on 1300 603 110 to discuss a suitable bunding solution.

Our range includes both indoor and outdoor bunding solutions ensuring your needs will be met whatever the requirement. If you're storing your drums in an uncovered area a weather cover will prevent the bund from filling up with rainwater!

CBCB1

Metal 1 x 1000L IBC Bund Pallet

These bunds are designed for storage of 1000L IBC's (Intermediate Bulk Containers). These metal units are zinc plated and are suitable for catching liquids such as oils and some combustible liquids. These single IBC bunds help prevent messy and costly spills and help prevent harm to people, the environment and property.

When storing IBC's outdoors in a non-covered area it is important you remember that when it rains the bund will catch the rainwater. Over time the bund will become full of water leaving no room for catching liquid spills. By utilising our weather covers you can prevent the bund from filling up with rainwater!

Order Code	Description	Dimensions W x D x H (mm)	Capacity
CIBCBI-Z	Zinc plated 1 x 1000L IBC Bund	1456W x 1456D x 830	1250L
CBCBI-Z	PVC weather cover with frame & zips – Suits CIBCBI-Z	1700 High (+ bund)

STORE YOUR IBC'S CORRECTLY

Galvanized 2 x 1000L IBC Bund Pallet

These heavy duty galvanized IBC bunds are ideal for storage of IBC's containing combustible liquids such as oils. The galvanised finish on these bunds helps ensure long term usage. IBC bunds help prevent messy and costly spills and help prevent harm to people, the environment and property.

When storing IBC's outdoors in a non-covered area it is important you remember that when it rains the bund will catch the rainwater. Over time the bund will become full of water leaving no room for catching liquid spills. By utilising our weather covers you can prevent the bund from filling up with rainwater!

CBCB2-G	PVC Weather cover with Frame & Zips – Suits CIBCB2-G	1700 High (+ bund)	

Flexible Drive Over Bunding

These flexible heavy duty PVC bunds prevent spills from spreading to other areas. This fantastic bund returns to its normal shape once driven over and removes the “bump” factor for forklifts which also helps prevent drums or IBC’s slipping off your forklift. Install is quick and easy and the bunds are supplied in high-vis yellow for easy identification.

Order Code	Description	Dimensions (mm)
CTB55020	2m Long x 50mm High Flexible Triangular Drive Over Bund	2000 Long x 50mm High

CTBUA	Polyurethane Floor Adhesive, 370 GSM (1 per every 2.5-3metres)	

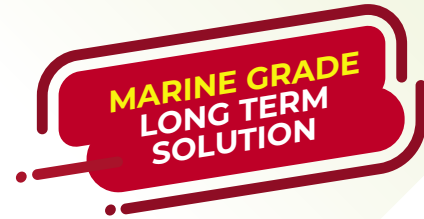

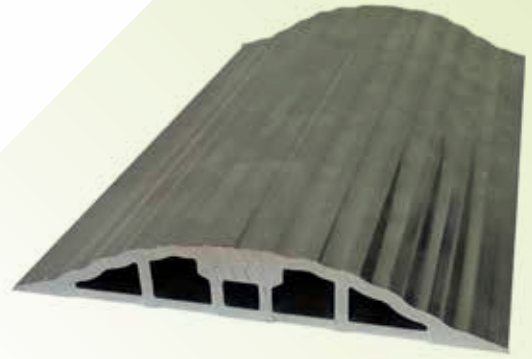

IS YOUR AREA BUNDED

Aluminium Drive Over Bunding

Aluminium bunding is an ideal long term solution which helps prevent spills spreading to other areas. This marine grade extruded aluminium provides a solid and robust floor bund which can withstand high frequency traffic.

The 30mm height creates a bund whilst still being low enough for forklifts and other vehicles to easily drive over without a speed bump style bump. Various factors such as vehicles, surface levels etc. must be taken into account before installation. This bunding can also be powdercoated to protect against certain hazardous bund applications. Supplied in 1200mm lengths and pre drilled for easy install. Sections can be mitred allowing you to create a rectangular or square bundled area.

Can be supplied in yellow powdercoated finish for minimum of 15 lengths.

Order Code	Description	Dimensions (mm)
CAFB-1200	Aluminium Floor Bunding Section. Pre Drilled for Fixing. Includes Fixings & Sealant for Install	1200L x 185W x 30mm High
