MADE IN AMERICA

2022 PRODUCT LINE

CELL

At Asterisk, we're always looking to improve. After years of feedback from our professional athletes, we've taken our complete line of knee protection and made it even better.

With all-new composite technologies, Asterisk engineers are busy working to make knee protection stronger, lighter and better fitting than our competiton. All of Asterisk products are made from high quality materials and every attention to detail.

CARBON

Carbon Cell 1

Asterisk Knee Brace is proud to announce the ALL-NEW Carbon Cell 1 (CC1). Our dedication to making the finest quality, fitting and performing knee braces in the world has led us to the design and development of the CC1. The CC1 is manufactured from Military Spec and Aerospace grade carbon fiber prepreg that is made in America, the finest in the world. Our focus during the design and development of the CC1 was making the slimmest, lightest, most comfortable knee brace in the world. We wanted a brace that fit so well on your leg, it looks like it's painted on, and we hit a home run!

At roughly 1lb or 454g (+/-depending on size) per brace, we believe it's the lightest, best fitting and most comfortable functional knee brace in the world, without sacrificing strength and durability. The CC1 is backed by a 3-year frame warranty. Asterisk is the inventor of the off the shelf carbon fiber performance knee brace, and in the world of knee protection and bracing, this is a game changer.

CARBON EELL 1

CARBON FIBER FRAME

- Anatomically correct design
- 12K aerospace carbon fiber Military Spec
- Ultra lightweight impact distributing structure

▲ ASYMMETRI-GLIDE HINGE

- Tracks the natural "rolling-gliding" motion of the knee joint
- Accurate track hole pattern
- Adjustable ext. regulator from 0° to 30°

ANTI-ROTATION TETHER

- Links the brace to the boot, making them as one
- Transfers forces of a lower leg rotation
- Adjustable to suit each individual

STRAPS

Standard adjustable strapping (4)

• TELE-TRI PATELLA CUP

- Three piece design (patented)
- High impact Nylon 6 material
- Full range of motion coverage of the knee cap
- ■Shock absorbent foam padding

WATER RESISTANT

- Non-corrosive metals
- Non-corrosive composites
- Hand washable soft materials

UNDERSLEEVES COTTON (included with braces)

- Cotton compression sleeves
- Optional upgrade
- Banded undersleeves

Optional zero G pants

Ultra-Cell 4.0

Introducing a new hybrid classic!

Ultra-Cell 3.0 utilizing the patella Cup from The Carbon Cell Creating the Ultra-Cell 4.0

With pants getting smaller in the knee area and being elastic plus the huge success of the Carbon Cell, we have used our collapsing Patented 3-piece patella to accommodate the low profile when your knee is bent. This also allows the parts to be changed in the field and will continue to have the Ultra-Cell 3.0 Strap Positioning Liners (SPL).

This brace will continue to offer the Patented "Anti-rotation Tether" to secure the best protection of any brace.

∞ A.C.M. FRAME

- Anatomically correct design
- Carbon fiber urethane matrix
- Rigid & lightweight, impact distributing structure

ASYMMETRI-GLIDE HINGE

- Tracks the natural "rolling-gliding" motion of the knee joint
- Asymmetrical design allows each hinge to set properly
- Allows for automatic tibia alignment of lower frame
- Adjustable ext. regulator from 0° to 30°
- Condyle shims for fine tuning fit

● A.R.C. CUFF

- Adjustable Retention Control
- Multiform rigid lateral support
- Built-in Anti-Rotation connection

ANTI-ROTATION TETHER (patented) Links the brace to the boot, making them as one

- Transfers forces of a lower leg rotation
- Adjustable to suit each individual

TELE-TRI PATELLA CUP (patented)

- ■Three piece design
- Easily removable
- High impact Nylon 6 material
- Full range of motion coverage of the knee cap

WATER RESISTANT

- Non-corrosive metals
- Non-corrosive composites
- Hand washable soft materials

3.0 Liners

Our liners are a low profile material which keeps the straps placed exactly where you want them, offering comfort and strap control.

UNDERSLEEVES COTTON (included with braces)

■ Cotton compression sleeves

Riding and racing motorcycles is serious business – even for the kids. There is no doubt their growing knees need and deserve protection, and the Asterisk Junior Cell Protection System is ready to do the job. Revolutionary design meets simple, stress-free fastening to create a comfortable and user-friendly brace for the pros of tomorrow. Sometimes the bike needs protection too so we've added a special guard to the hinge area. (Your riding pants and tank graphics will thank you!)

♠ A.N.I. FRAME

- Anatomically correct design
- Glass fill Nylon 6 Injected composite
- Rigid & lightweight, impact distributing structure

★ SYMMETRI-GLIDE HINGE

- Tracks the natural "rolling-gliding" motion of the knee joint
- Accurate track hole pattern
- Adjustable ext. regulators from 10° to 30°

D.A.U. CUFF

- Dual Adjustment accommodates leg growth
- Uniform rigid lateral support

ANTI-ROTATION TETHER (optional) Links the brace to the boot, making them as one

- Transfers forces of a lower leg rotation
- Adjustable to suit each individual

STRAPS

■ Standard adjustable strapping

TELE-TRI PATELLA CUP

- ■Three piece design
- High impact Nylon 6 material
- Full range of motion coverage of the knee cap
- ■Thermo-Formed EV50 shock absorbent foam padding

WATER RESISTANT

- Non-corrosive metals
- Non-corrosive composites
- Hand washable soft materials

UNDERSLEEVES COTTON (included with braces)

■ Cotton compression sleeves

TELL"

In 2019, we introduced the Micro Cell. The Micro Cell is designed specifically for the younger rider, approximately 5-10 years old, depending on size and weight. This is also the first of our "Slim Line" of carbon knee braces.

The Micro Cell has an epoxy prepreg carbon frame, made in our factory in Corona, California, with a full coverage patella cup and hyper extension stops ranging from 0-30 degrees (similar to our current Jr Cell) and Carbon Cell Braces. It is also equipped with our true motion hinge. This brace offers rigid lateral arms for the best support and lowest profile. The Micro Cell assures all the important areas of knee protection are addressed which most other braces do not offer. (Option thickness available on request)
