## PRODUCT INSTRUCTIONS Model Number: 30M-B60

Revised January 25, 2019

Bogert Aviation Beechcraft Duke Model 60 Instruction Manual

## Beechcraft Duke (60 Series) Jack Pads

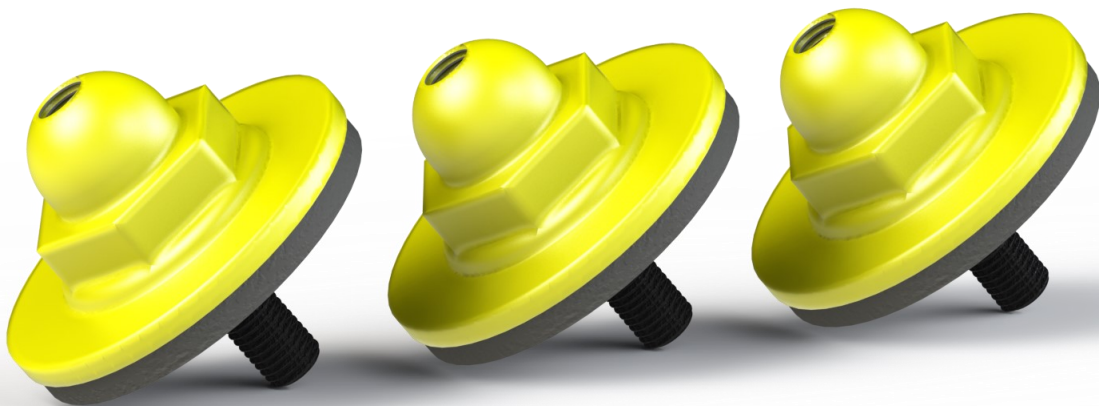

The Duke Jack pads are sold as a set of 3 matching pads for all of the model 60 aircraft. These are suitable for lifting the aircraft using wing jacks.

These jack pads are heavy duty steel construction and use hardened steel studs. These pads are equipped with rubber pads between the jack pad and the surface of the aircraft and 3/4" diameter jack points that are compatible with most aviation wing jacks.

Attach the Jack Pads with standard bolts or screws.

**Follow Manufacturer's Instructions for jacking aircraft.**

Item	Model Number	Qty	Description
1	30M-B60	3	Beechcraft Duke Model 60 Jack Pads

The warnings, precautions, and instructions discussed in this manual cannot cover all possible conditions and situations that may occur. The operator must understand that common sense and caution are factors, which cannot be built into this product, but must be supplied by the operator.

### **Cautions:**

- Support the axle anytime the wheel is removed with a suitable axle stand or blocking. (Bogert Aviation 17M-LGSS, Landing Gear Safety Stand)
  - Do not allow anyone to climb on or get into the aircraft while supported by a jack.
  - “WARNING” Study, understand and follow all instructions before operating this device.
  - Lifting device only.
  - Immediately after lifting, support aircraft with appropriate means.
  - Do not exceed rated capacity. Use only on hard, level surfaces capable of sustaining rated capacity loads.
  - Lift only on those areas of the vehicle as specified by the vehicle manufacturer.
  - Ensure that the lift point is properly centered on the jack saddle.
- Always wear safety glasses when using this equipment.
