

# cellpod silver<sub>(Ag)</sub>mask

cellpod is a beauty device brand by Ecowell, designed to make aesthetic care easily accessible at home.

**It's different when cellpod makes it**

cellpod is the beauty device brand of Ecowell Co., Ltd. a research-oriented company specializing in skin technology. We have developed technologies to address customers' skin concerns through systematic research and innovation led by various experts with doctoral degrees.

With our expertise and technological prowess, we not only offer solutions under the cellpod brand but also provide customized solutions for industry partners to implement their own specialized beauty devices.

Through collaboration with industry partners, we aim to grow together and provide optimized skincare solutions to a broader range of customers.

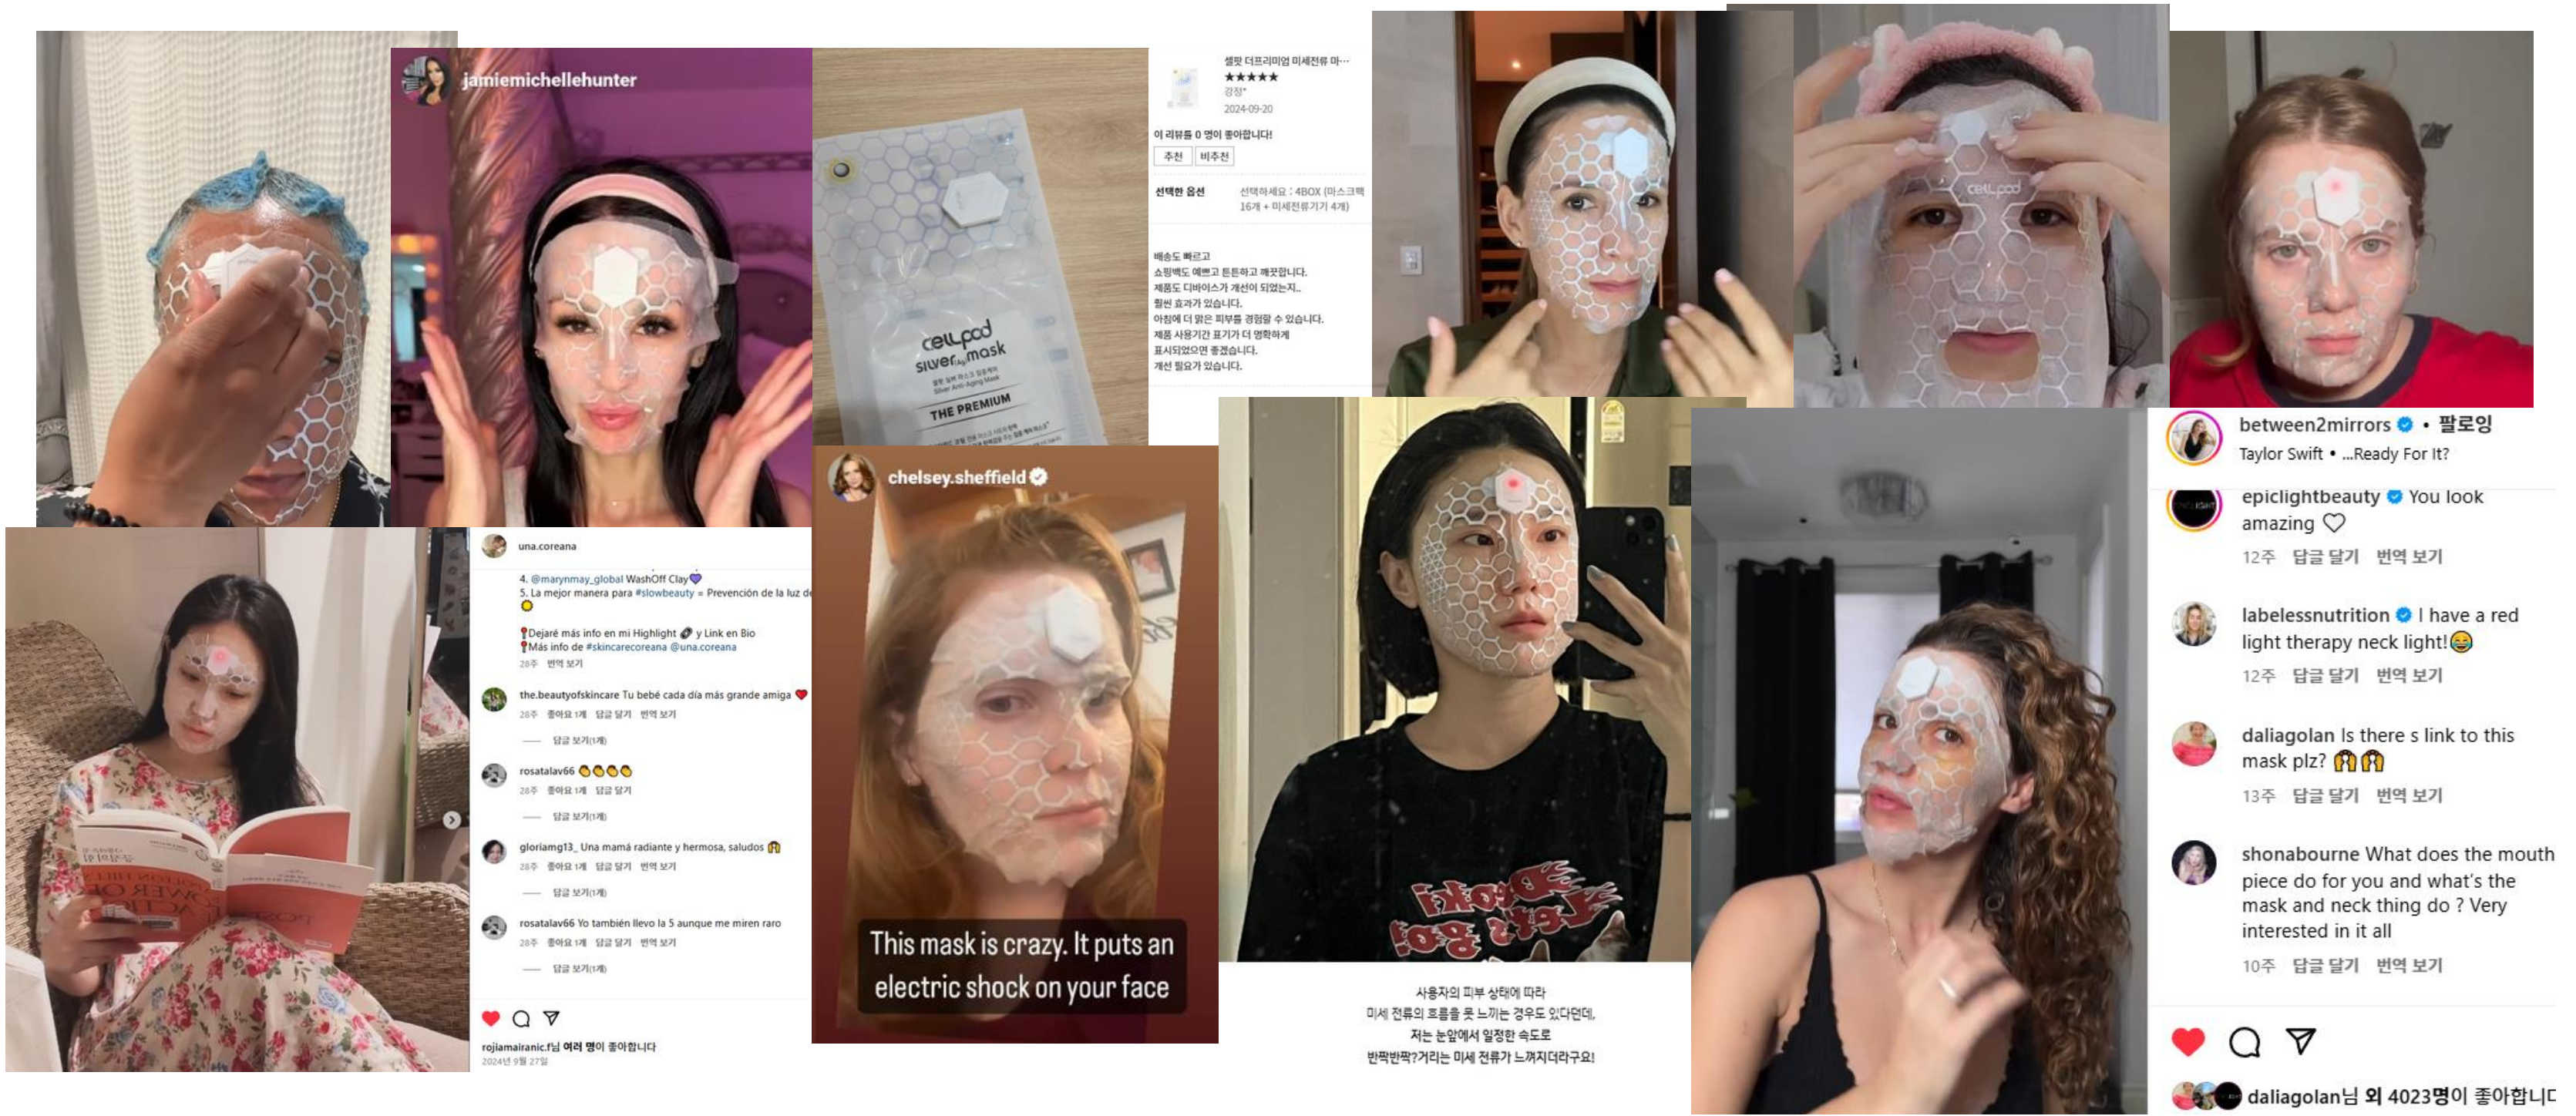

# FOR THOSE WHO

- ✓ Those who haven't seen results from professional facial care
- ✓ Individuals struggling with skincare products due to sensitive skin
- ✓ Those seeking simple skincare solutions at home without professional care
- ✓ Anyone looking to experience noticeable improvements like wrinkle reduction and enhanced skin elasticity
- ✓ Busy individuals in need of convenient skincare options
- ✓ Those requiring fast and effective skincare solutions within a short period of time

# Globally Recognized K-Smart Beauty Tech

# The key lies in bioelectricity and absorption

## Microcurrent

Microcurrent activates the body's natural bioelectricity, promoting skin regeneration. This leads to a reduction in wrinkles and an improvement in elasticity.

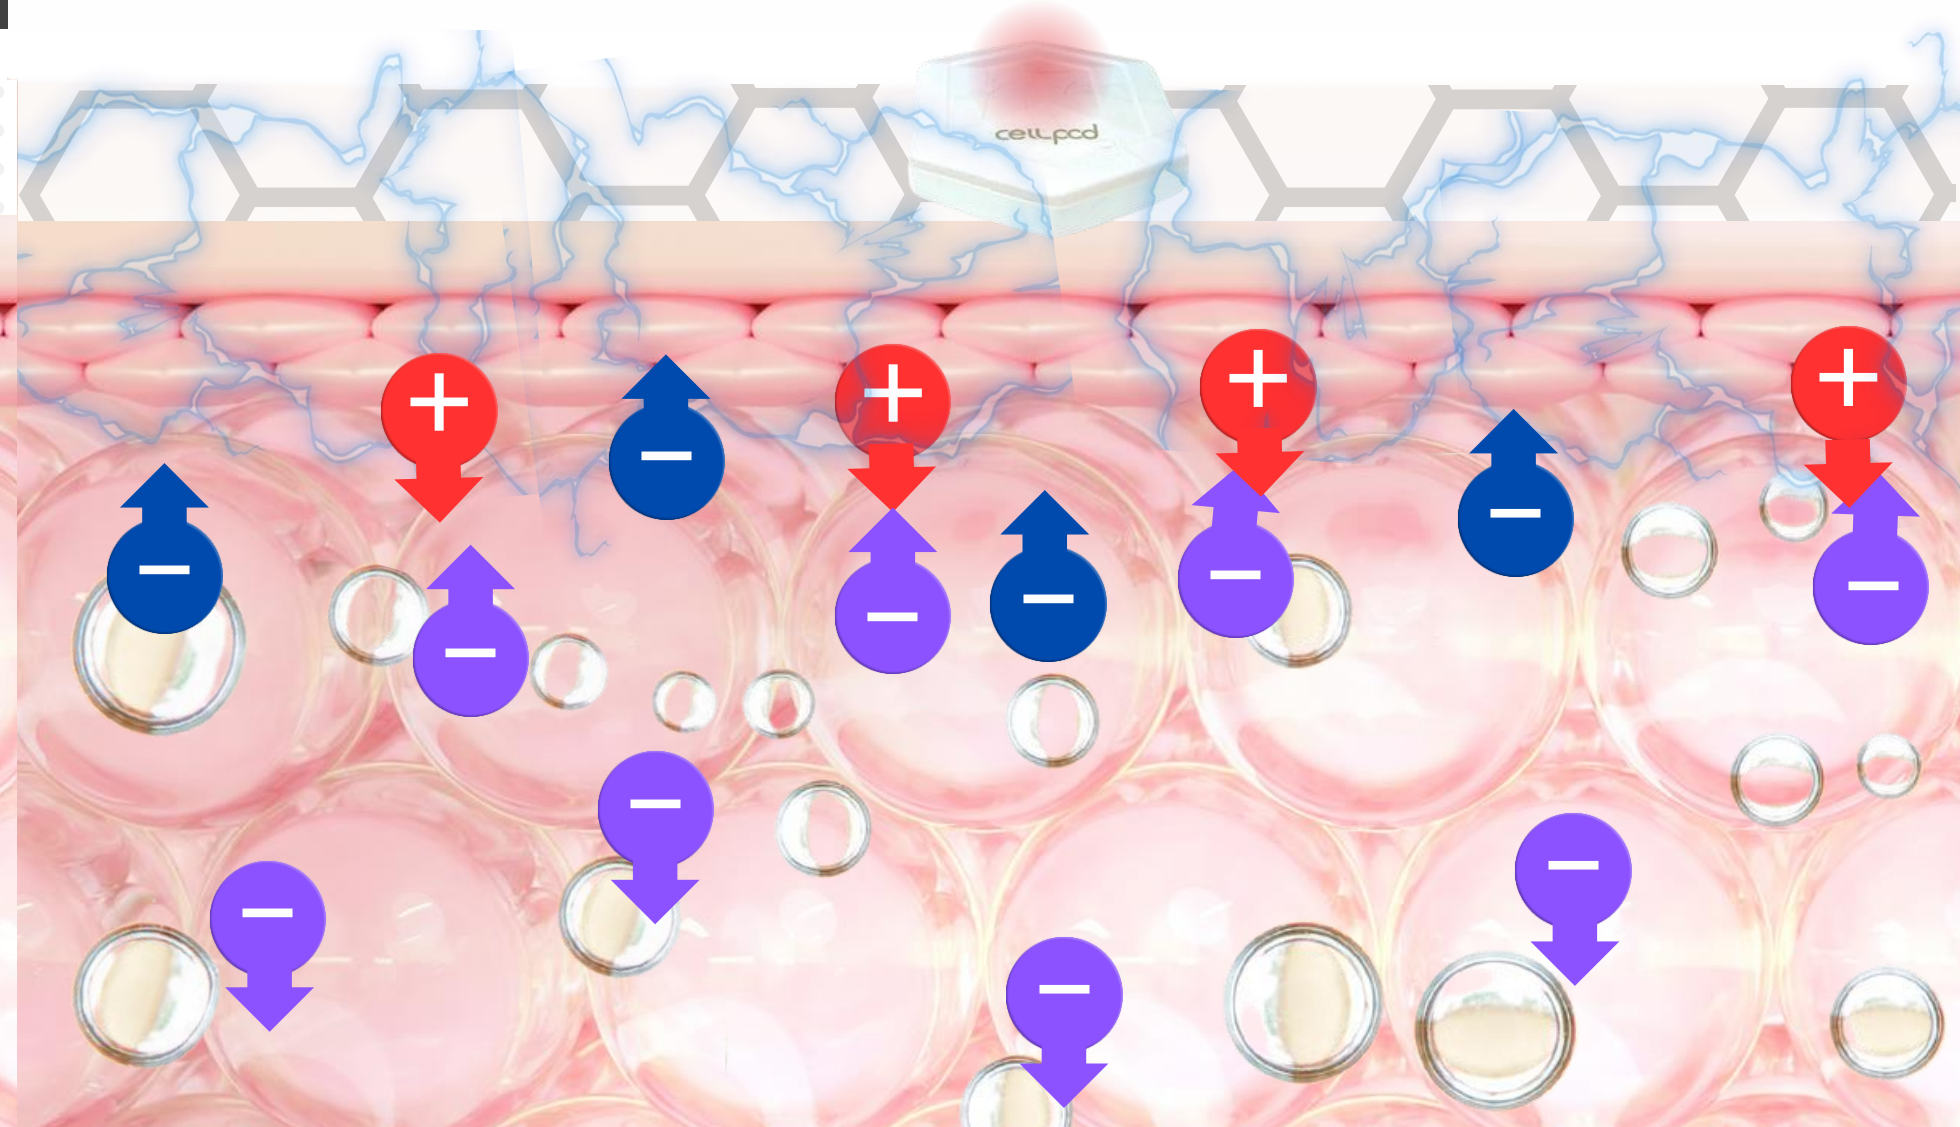

## Galvanic

Galvanic current pushes nutrients deep into the skin and pulls out impurities using electrical charge balance, enhancing the absorption of active ingredients by up to 6 times.

When using a regular mask pack

When using the microcurrent + galvanic mask pack

# AT-HOME SKINCARE AKIN TO A BEAUTY SALON

The EWG All Green Rated essence is applied to seamless mask packs, delivering it deeply into the skin with microcurrent and galvanic technology.

Experience the same quality of skincare as you would receive at a beauty salon, right in the comfort of your home.

## Radio Frequency Stability

Minimization of electrical resistance for microcurrent stability

## 99% silver paste + vitamin C coating

Film Transfer Technique, Vitamin C Infusion, and Coating

## Tight Pattern

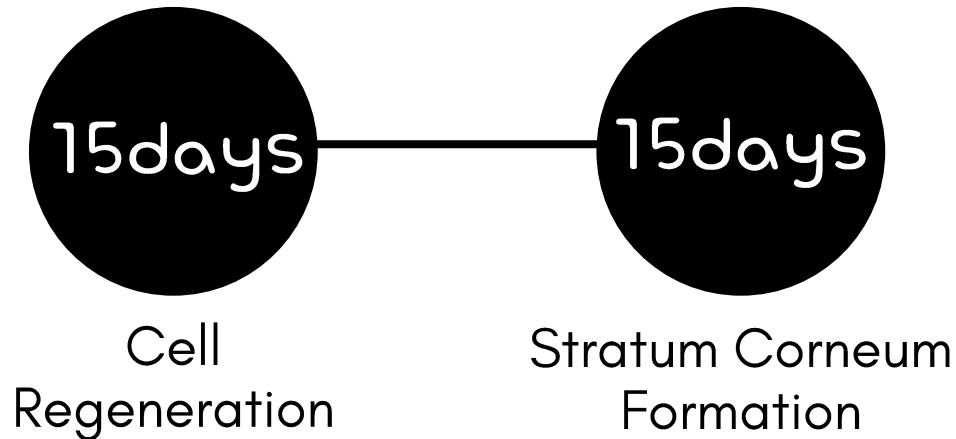

For thin and sagging areas of the skin, a high-density pattern is applied.

## 100% Tencel

Fabric made from safe and natural materials without harmful substances

# Utilizing the 30-day skin regeneration cycle

Designed to optimize skin health in accordance with the 30-day regeneration cycle.

Depending on skincare goals and skin condition, choose between Full Pack or Half Pack options.

This advertisement features a woman's face on the left. On the right, there is a product shot of the 'Microcurrent Silver Mask Pack Full Pack (8 sheets)'. The product shot includes a box with a hexagonal pattern and a stack of white sheet masks. A black circle with white text '30-Day Care' is positioned next to the product. Below the product, a timeline shows four white sheet masks labeled 'Week 1', 'Week 2', 'Week 3', and 'Week 4'.

**30-Day Care**

**Microcurrent Silver Mask Pack Full Pack (8 sheets)**

Week 1 Week 2 Week 3 Week 4

Improve wrinkles and skin brightness over 30 days. It is recommended to use twice a week.

This advertisement features a woman's face on the right. On the left, there is a product shot of the 'Microcurrent Silver Mask Pack Half Pack (4 sheets)'. The product shot includes a box with a hexagonal pattern and a stack of white sheet masks. A black circle with white text '15-Day Care' is positioned next to the product. # SOLID AND METICULOUS

Individually packaged essence, stable support base, and irritation-minimizing magnetic connectors.

Durable and meticulously crafted microcurrent mask sheets.

## Separate packaging

The essence and mask sheets are separately packaged to prevent contamination and corrosion, ensuring their quality and effectiveness.

Valve

## Attaching magnetic connector stickers

The skin is minimally irritated as metal does not directly contact the skin.

## Device holder

The sheet's magnetic connectors securely attach to the device holder, ensuring stability and ease of use.

# HOW TO USE

1. Press the button on the mask pack, then squeeze the ampoule beneath the sheet to apply it.

2. Allow 2–3 minutes for thorough absorption before applying the pack to your face.

3. Place the microcurrent device on the mask pack connector located on your forehead and activate it.

4. Allow the microcurrent device to operate for 20 minutes, facilitating the penetration of active ingredients into the skin layers.

5. After 20 minutes, remove the mask pack and gently pat any remaining essence onto your skin to finish.

## **Sensor Recognition Mode (5 seconds)**

The sensor recognition signal sounds, and the indicator light flashes rapidly.

## **Boosting Mode (20 minutes)**

The start signal sounds, and the indicator light flashes slowly.

## **Standby Mode (20 minutes)**

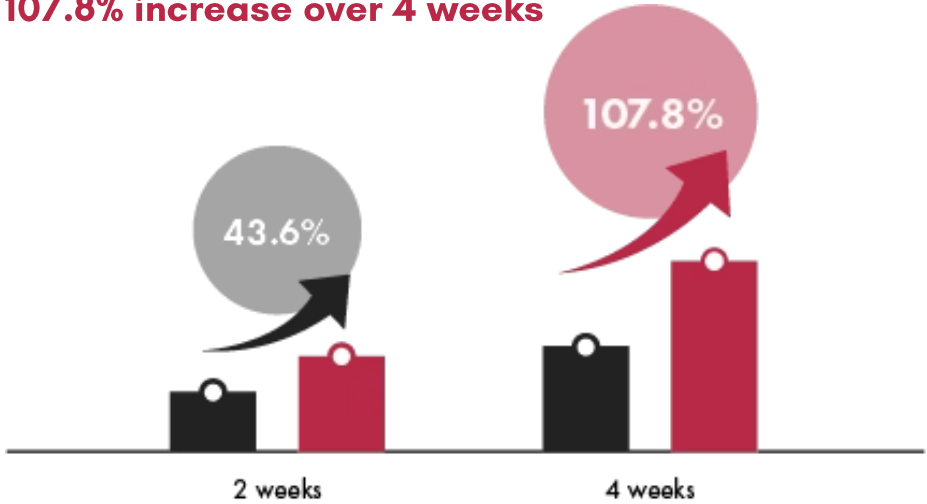

The shutdown sound plays, and the indicator light turns off. To prevent continuous operation due to sensor errors, the power is automatically shut off for 20 minutes. Pressing the button again allows for reuse after 20 minutes.

# CLINICAL TRIAL RESULTS

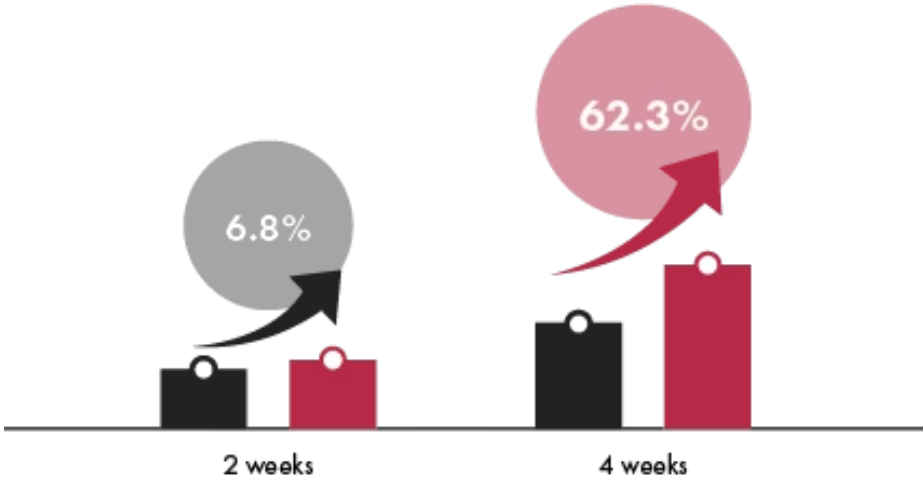

## Test 1. Increase in Skin Elasticity on the Cheeks

Compared to using just a sheet mask,  
**107.8% increase over 4 weeks**

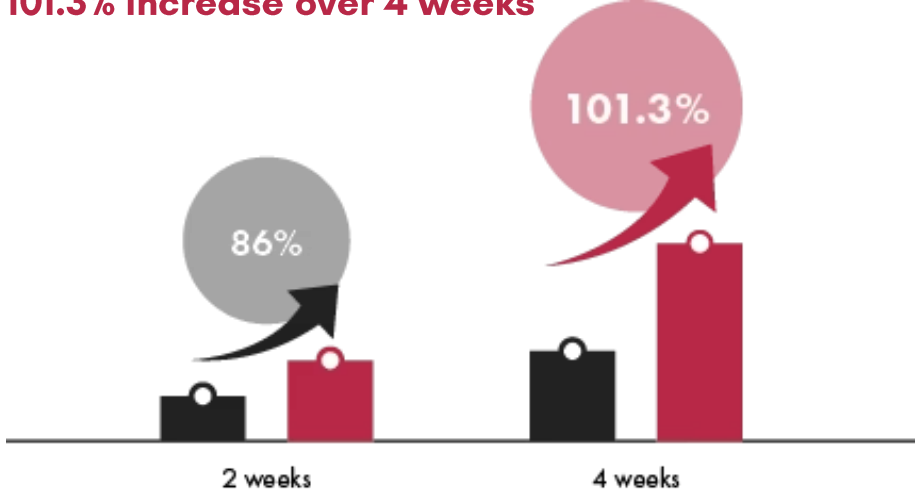

## Test 2. Increase in Skin Elasticity on the Forehead

Compared to using just a sheet mask,  
**62.3% increase over 4 weeks**

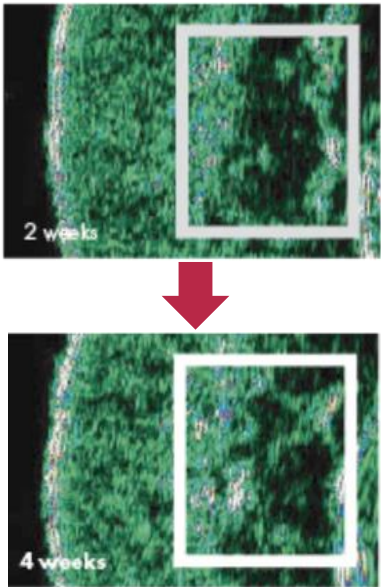

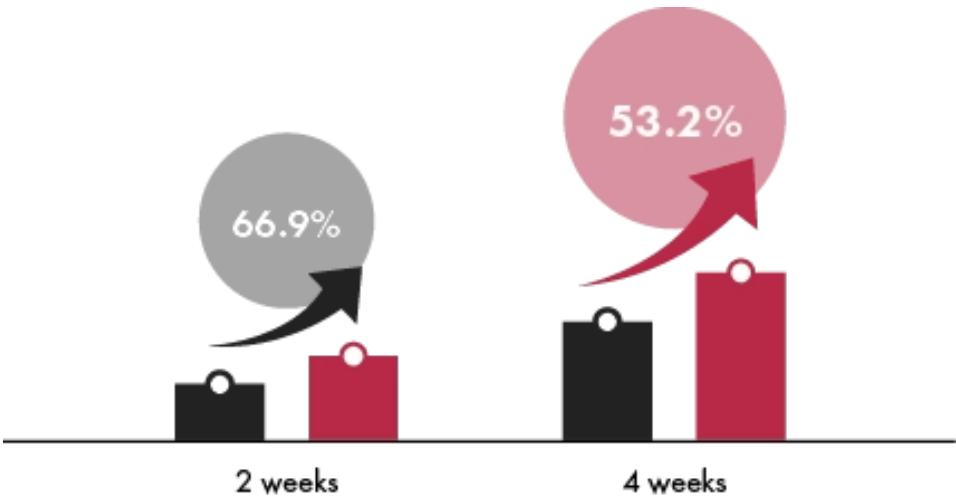

## Test 3. Increase in Skin Elasticity around the Eyes

Compared to using just a sheet mask,  
**101.3% increase over 4 weeks**

## Test 4. Increase in Skin Density

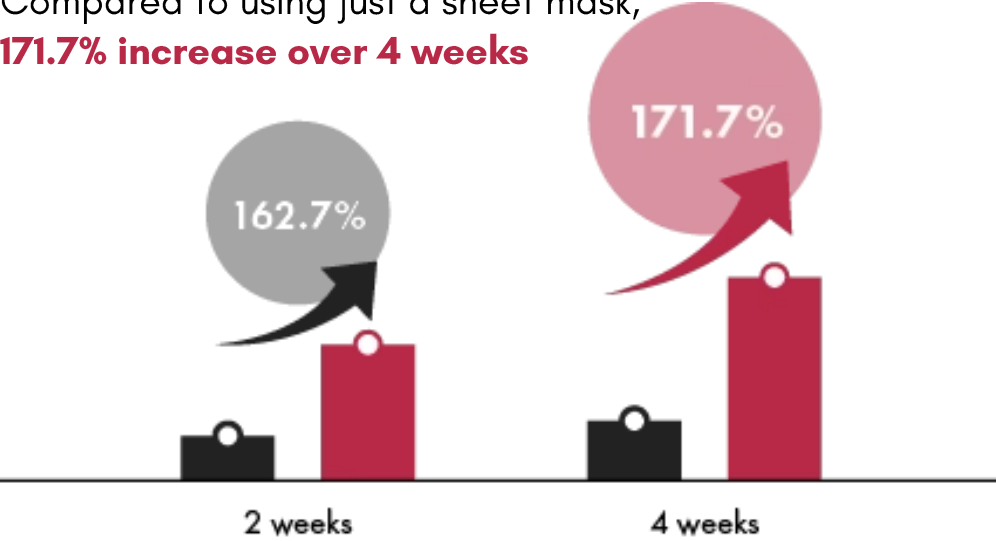

Compared to using just a sheet mask,  
**53.2% increase over 4 weeks**

A 40-year-old woman with dry skin using a microcurrent silver mask pack along with a device.

## Test 5. Improvement in Skin Tone (Whitening)

Compared to using just a sheet mask,  
**171.7% increase over 4 weeks**

A 40-year-old woman with normal skin using a microcurrent silver mask pack along with a device.

# SAFETY CERTIFICATION AND TESTING

## Passed skin irritation tests conducted by the Korea P&L Skin Research Center

The microcurrent silver mask has been proven to be "non-irritating" through observation notifications from the Ministry of Food and Drug Safety in Korea.

## Passed Conductivity Test

Mask Sheet: Conductivity Test Report  
Device: KC Certification Completed  
(Registration Number: R-R-EcW-EBM-E12111)

## Passed Ophthalmic Safety Test

After 4 weeks of use, an ophthalmologist observed no corneal damage-related side effects with the "Microcurrent Silver Mask," rating its ophthalmic safety as "excellent."

# cellpod Microcurrent Maskpack **REBORN UNDER YOUR BRAND**

**Manufactured as OEM/ODM and distributed  
and sold under your own brand**

Customization is available to align with your brand, including printing your brand logo, changing product and package colors, and altering the essence formulation.

# FAQ

## **Q. I correctly wore the device but it's not functioning.**

A. Lightly press the sensor recognition area of the attached device towards your forehead for about 5 seconds. When the light blinks (sensor recognition mode), the boosting mode will operate normally.

## **Q. The device does not detach easily from the magnetic terminal.**

A. Gently press and then push upwards to detach, and it will easily come off from the magnetic connector of the mask sheet.

## **Q. The metal connector of the mask pack has detached.**

When detaching the device, the metal connector of the mask pack may come off. The mask pack is disposable and cannot be reused.

## **Q. What should I do after using the device?**

After 20 minutes of operation, the device will automatically shut off. At this point, remove the device, wipe off any remaining essence, and store it separately. If you do not remove the device, it may automatically restart after 20 minutes in standby mode. Once the boosting mode ends, you should remove both the mask and the device to safely conclude the session.

## **Q. I want to continue using it.**

A. To ensure stable use of the device, it is set to a 20-minute standby mode. Please wait for 20 minutes after the boosting mode is completed before using it again. (The indicator light does not blink in standby mode.)
