

MARINE LAYER

SUSTAINABILITY TIP SHEET

Wash Clothes On Low.

COLD WATER > HOT WATER.

Most of the energy in washing machines actually goes towards heating the water. Hand washing or machine-washing your stuff in cold water can save 500 lbs of CO2 from entering the atmosphere every year.

Don't Toss Out Plastic.

SET UP RECYCLING BINS.

Plastic doesn't break down in landfills...at all. Yikes. Since it can be recycled to make all kinds of other stuff, why not keep it around longer?

Use Reusable Bags.

PSST...OUR TOTE BAGS WORK GREAT.

Keep reusable bags around when you go grocery shopping. Forget to bring them? All good. Keep the plastic bags around for when your pup needs a walk.

Go Paperless.

SORRY, DUNDER MIFFLIN, IT'S 2019.

Get the PDF version. Opt for e-mail receipts if that's an option. Opt out of junk mail. Pay bills online. Sign up for e-statements. Don't print this page out. You know, all kinds of things.

Learn to Sew.

HONESTLY, YOUTUBE IS A GREAT TEACHER.

Button fell off? Rip in your clothes? Instead of throwing it out, get a small sewing kit, and watch a quick video on how to use it.

Carry a Reusable Water Bottle.

PRO TIP: RESTAURANTS FILL IT UP FOR FREE.

You can save an average of 1,460 plastic bottles per year by using a reusable bottle.
