## ARTIST STATEMENT

As I begin to push paint across the canvas, I allow the application of layers to pour out intuitively. I paint with no intentional form or subject. While eliminating control from the mind, my hand starts to dance with paint. The organic beauty created from thoughtless marks and brush strokes allow for the painting to breathe its own life into me. Abstract becomes reality with a little help of familiar embellishing. Can a mark remind you of a memory? Whether it is

a place you have been or a place you long to be, the subconscious always prevails. This collection was created as I fully lean into what I've always known, what can not be taught, and what feels right.
