

Tuning Equipment Lists

Basic:

1. Side edge file guide
2. File
3. One mid-range/medium coarseness stone- ceramic or diamond
4. Ski specific iron
5. 2 vise set up
6. Gummi stone
7. Plexi wax scraper
8. One all around base brush, nylon
9. Wax; universal or hydrocarbon (CH8)
10. Tuning gloves- thin but tough

Intermediate:

1. Adjustable side edge file guide, 1* and 2* at least
2. 1* Base edge file guide
3. File
4. Medium and fine coarseness stones
5. Ski specific iron
6. 3 vise set up
7. Gummi stone
8. Plexi scraper and sharpener
9. Copper, horse hair, and nylon brushes
10. Wax for multiple temperature ranges, hydrocarbons i.e. CH8, CH6, etc.
11. Tuning gloves
12. Travel workbench
13. Large stiff paint brush to clear edge debris
14. Clean towel

Advanced:

1. Adjustable side edge file guide, 2*, 3*, (4* optional)
2. .5* base edge file guide, 1* base edge file guide
3. Coarse file and fine file
4. Small wire brush for cleaning files
5. Coarse, medium, fine, ultra fine coarseness diamond stones
6. Sidewall removal tool
7. Ski specific iron
8. 3 vise set up
9. Gummi stone
10. Plexi scraper and sharpener
11. Steel, copper, horse hair, and nylon brushes
12. Range of waxes; hydrocarbons for training, high and low fluorocarbon waxes for races.

13. Tuning gloves
14. Travel workbench
15. Large stiff paint brush to clear edge debris
16. Clean Towel

**It is recommended to have a tool box to keep tuning equipment safe, clean, and organized
