### 5. THE ACTIVATION IS DONE.

## **3. VERIFY YOUR CONNECTION**

- One way is to verify that the signal icon on the top bar of your phone has at least one bar.
- Also, you can go to Settings --> Cellular and select your Rapidesim to verify that the Data Roaming toggle is on.

### • Can | install the eSIM without an internet connection?

To install the eSIM it is necessary that you have an Internet connection through a WI-FI network or cellular data that allows you to carry out the necessary configuration on your cell phone. For this reason, we recommend that you install it before you arrive at your destination.

• Can | activate the eSIM without an internet connection? To activate the aSIM, you do not need to have an Internet connection, since activating roaming or data roaming from your cell phone settings will activate the plan. We recommend that you activate it as soon as you arrive at your destination so as not to consume your data plan ahead of time.

### • Why do | need the internet to use the app?

You need to have an Internet connection because it is necessary to validate the data provided with third parties, and, so that you can see the consumption of your data plan.
