# Care and Cleaning

Natures Composites remains committed to delivering a low maintenance product to its customers. However, the location of your product means that dirt, scratches, oil spills, and mold can build up over time. Below are our recommendations for care and cleaning

## Dirt Build-Up

Natures Composites products can simply be cleaned using warm water, a soft brush, and a mild detergent like soap to remove dirt, grime, and rust build-up.

## Oil Contamination

Staining may occur with Natures Composites' product are exposed to oil. Rinse area immediately with hot water.

## Mold

Semi-annual cleaning of Natures Composites' products will help prevent mold spore growth, simply clean with warm water, a soft brush, and a mild detergent like soap.

## Scratches and Scuffs

Natures Composites' products are designed where the inside material is the same at the outside. Scratches and Scuffs will fade over time (about 10-15 weeks) and will not comprise the integrity of the product.
