

**INSTALLATION** GUIDE

## TRADITIONAL PICKET FENCE INSTALLATION GUIDELINE

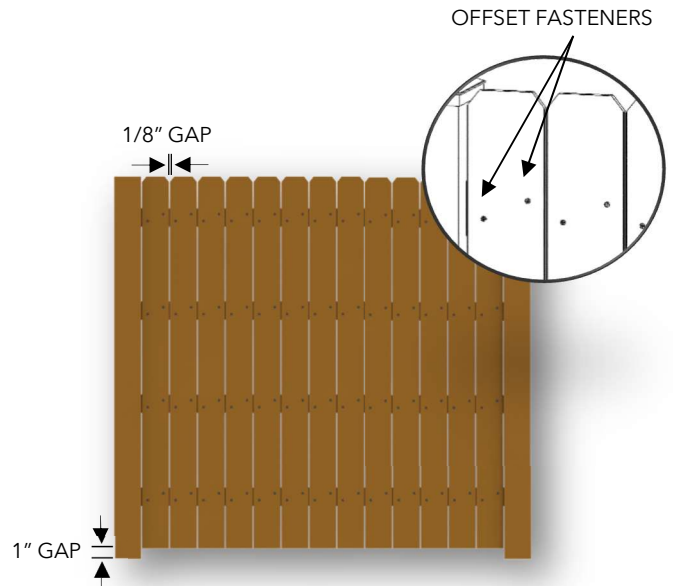

### BEFORE YOU BEGIN

1. Verify the location of all underground utilities.
2. Locate property lines.
3. Consult with HOA, if applicable follow CC&Rs Guidelines
4. Consults local and regional building codes.
5. Obtain all necessary permits as required by building codes.
6. Always wear appropriate safety equipment.
7. Store pickets horizontally in a dry place away from moisture.

### RAIL INSTALLATION

1. After posts are set, fasten stringers to the posts
2. Space the Bottom Rail 8" from the ground and the Top Rail 6" from the top of the picket placement. Continue spacing Rails at least every 17-1/2".
  - a. Note: If deflection occurs add additional Rails.

### POST INSTALLATION

1. Fasten the first picket to rails next to post with two (2) composite screws per rail per picket, spacing pickets at least 1/8" from the post.
  - a. Offset fasteners, place screws at least 1/2" from the edge of the picket.
  - b. Elevate pickets 1" off the ground.
2. Continue installing pickets, equally spaced in the remaining area (at least 1/8" spacing and offset screws).
