

**Natures Composites**  
Premium Sustainable Fencing

# Traditional Fence Pickets

Natures Composites is the new standard in fencing, giving you the traditional look of real wood, but without all the hassles. Natures Composites unique formulation provides a true composite product that is durable, sustainable, environmentally friendly and is resistant to moisture and rot, requires low maintenance, and doesn't require staining or sealing.

## About Us

Natures Composites manufacturing plant and main office are located in Torrington, Wyoming. Natures Composites was created in 2010 and has been committed to providing sustainable, durable, composite fencing materials.

Natures Composites products are formulated using simple components, wheat straw and HDPE plastic, with the goal in mind to reduce unnecessary waste and utilize sustainable components.

Natures Composites sources wheat straw from American farmers, while also providing jobs in Wyoming.

## What are Composites?

Composite materials are classified as product that contain multiple ingredients. Typical standard for composite lumber is a combination of lumber fibers, plastic, and other necessary agents, these are known as WPC (wood plastic composites).

## Why Composites?

With the push to more sustainable living, composites have become a major competitor in the lumber industry. Designed for high durability, low maintenance, and extreme resistance Composites are a clear choice for Decking and Fencing.

Though Composites have a high upfront cost, Composites have a longer lifespan than traditional wood lumber which require constant upkeep.

## Why Natures Composites

Natures Composites products are a true composites material. Uniquely formulated with wheat straw and HDPE plastic, Natures Composites products are not made with wood.

Unlike other “composite manufacturers”, Natures Composites’ products are a through and through composite material, meaning the outside material is the same as the inside. This allows Natures Composites products to be cut to any size without damaging the integrity of the board.

When correctly installed Natures Composites’ traditional fence pickets can withstand high Arizona heat and extreme Wyoming wind.

Durable, Natures Composites’ products designed to resist moisture, rot, and insects. Yet provide a clean and modern look that requires low maintenance, just simple cleaning. Natures Composites focuses on provides a sustainable product for everyone.

# Traditional Fence Pickets

## Environmentally Friendly

Natures Composites products are composed of Wheat Straw and HDPE Plastic.

- Wheat Straw is an annually renewable resource, that is a byproduct of Wheat production. No trees are used during the manufacturing process.
- HDPE Plastic is an environmentally stable product that is long lasting, recyclable, and considered to be a low-hazard plastic. Natures Composites use as much recycled plastic as available.
- Too offset waste, Natures Composites products are upcycled when product does not meet quality standards.

## Low Maintenance

Natures Composites products are engineered to have a textured finish with a non-reflective surface that requires minimal maintenance, and no staining or painting.

## Durable

Natures Composites products are resistant to moisture and rot. Will not splinter or crack, making them Kid and Animal safe.

10-Year Warranty on all Natures Composites Traditional Fence Pickets.

## Ease of Use

Natures Composites products have the workability of wood without the worries.

- Can be trimmed without compromising the integrity of the picket.
- Pickets cut and screw like wood.
- Color goes all the way through the board.
