ULTIMATE Cheat Sheet to 10X Your Income with Style

My friend Jing landed an interview for his dream job at Apple.

Jing was the smartest guy I knew...

But when I saw him on interview day... **I knew he wouldn't get the job.**

Why?

He had on an oversized suit, ugly dress shoes, and NONE of it matched.

How much did that mistake cost him?

He could've leveled up his income by 10X without that mistake...

Don't throw away money like he did... **dial in your style.**

#1. Know the Name of Your Tailor

Why do James Bond and Harvey Specter look so great in their suits?

It's NOT the price tag. It's the PERFECT fit. You look better in a [well-fitted \\$100 suit](#) than a poorly fitted \$10,000 suit.

Fitted clothing sends "success signals". You could be losing million dollar opportunities just because your fit is wrong.

#2. Buy Colors That Signal Trust

Do people see the colors you're wearing as positive or negative? A 2009 British study in *BMC Medical Research Methodology* confirmed that [the color of your clothes sends out a powerful subliminal message](#).

For example:

- Red means power and authority.
- Blue signals trust and loyalty.
- And your favorite grey shirt? It makes you look dull and depressing.

What message does your clothing send?

If you're not controlling the message you send, others will decide that message for you...and it may not be the one you want.

#3. Trash Your Trends

Life isn't the fashion week runway...

Trends come and go...style is timeless.

Quick... tell me the most EMBARRASSING piece of clothing you own (I won't judge.)

Now - why is it so embarrassing? I'm betting **it's hideously outdated**. You'll never be able to wear it again. Waste of time and money.

Focus on [timeless style](#) and free up capital you can invest elsewhere.

#4. Trash Cheap Clothing

Ever gotten excited about scoring a great bargain... and in 3 washes your cheap clothes were ready for the bin?

You can't afford to waste your money on poor quality.

You may as well burn your money - it's a false economy. [Buy the best quality you can afford](#) and you will save money long term.

#5. Buy Less, But Better Quality

Do you have a closet full of clothing but NOTHING to wear?

This is the "choice paradox" ...

Keep it simple. 14 pieces of clothing = 120 outfits.

How?

My secret style weapon...[The Interchangeable Wardrobe!](#)

Focus on the versatility of individual items you buy, rather than shopping for outfits and I guarantee you'll save money, own better quality, and send the message you want to send!

Conclusion

When you send “success signals” ...people will want to:

- Do business with you
- Be associated with you
- Hire you
- Promote you

You become MAGNETIC!

Do you want to discover more on HOW you can implement these tips in your life?

You could take this cheat sheet and fumble through your own closet while you try and implement them...

OR...we can give you a roadmap to a wardrobe built for financial success!
