

CLEANING & STORAGE

ANTI FOG

The anti-fog feature is available on certain WarBird models that do not contain the reflective Shield (mirrored) finish. WarBird's anti-fog treatment technology is washable, but the more you wash them the less effective the treatment will become. The number of washes they can endure is dependent on the washing technique but on average, the anti-fog treatment should hold up to about 50 washes.

If your lenses have an anti-fog treatment, we recommend removing dust and debris by blowing on them or rinsing them gently. Only use a mild dish soap when the lenses are very dirty or oily but try to avoid it when possible, to prolong the life of the anti-fog feature.

CLEANING

Keeping your WarBird eyewear clean is imperative to clear vision and prolonging their lifespan. A quick rinse and wipe will prevent the build-up of dust, fingerprints, and oils.

- 1 Rinse your sunglasses under lukewarm water. Hold them under the gentle flow for a few seconds to remove any loose dirt or debris.
- 2 Apply a drop of mild dish soap to each lens. A mild dish soap is gentle enough for most sunglasses, but avoid harsh detergents or anything containing alcohol, ammonia, or abrasives. Do not use window cleaning products as these contain harsh chemicals that can damage your lenses and frames.
- 3 Gently rub the lenses with your fingertips in a circular motion. Work your way from the center outwards, making sure to cover the entire surface.
- 4 Rinse the dish soap off thoroughly under lukewarm water. Make sure all the soap residue is gone to avoid leaving streaks.
- 5 Dry your sunglasses with a clean non-treated (no aloe or lotion additives) tissue. Pat gently, avoiding rough wiping that can cause scratches.
- 6 Keep your microfiber bag clean. Hand wash with cool soapy water and let air dry. You can also machine wash with cold water on gentle cycle. Do not use bleach or fabric softener. Air dry or machine dry on low setting. This will prevent the bag from accumulating harmful dirt, debris, and oils.

NOTE

Beware of common cleaning mistakes. Avoid harsh detergents or anything containing alcohol, ammonia, or abrasives. Do not use window cleaning products as these contain harsh chemicals that can damage your lenses and frames.

STORAGE

Proper storage of your eyewear is essential to extending their lifespan. When not in use, store them in a well-ventilated area and avoid excessive heat or high humidity. Do not store on the dashboard of a vehicle.

DISCLAIMER: It is important to understand the limitations of your eyewear and use them responsibly. Misuse may result in serious and permanent eye injury, including blindness, or death.

Only WarBird eyewear with the Z87.1+ markings are rated to withstand high-velocity projectile impacts, safeguarding your eyes from flying objects, debris, and accidental tool contact. The Z87.1+ markings are located on the lenses and the inside of the temple pieces.

While highly impact-resistant, your WarBird glasses are not indestructible and can still be damaged by extreme forces or sharp objects. Regular inspection for cracks or chips is crucial. Damaged frames or lenses create a safety hazard and should be replaced immediately.

These glasses are not designed for protection against specific hazards such as chemical sprays or splashes, bloodborne pathogens, lasers, or high-energy radiation. Consult appropriate safety gear for such environments.

These glasses are not suitable for nighttime driving, driving in dimly lit conditions, looking directly at the sun, or for other intensely bright situations such as welding.

These glasses do not provide protection against fragmentation from explosive devices, and direct fire from firearms or air guns.

For optimal protection, ensure your glasses fit snugly and comfortably. Loose or ill-fitting glasses can compromise their effectiveness.

Remember that safety glasses are a crucial part of personal protective equipment (PPE) ensemble but should not be considered a substitute for safe work practices. Always follow workplace safety guidelines and regulations.

To determine the specific protection provided by your model of eyewear, please visit our website at www.warbirdpro.com or contact a product specialist by calling (231) 922-5000 or by email at support@warbirdpro.com.

WARNING Improper use or failure to understand the limitations of WarBird eyewear could result in serious and permanent eye injury, including blindness, or death. Always follow safety guidelines and consult instructions.

EYEWEAR LIMITED WARRANTY

WarBird warrants eyewear against defects in materials and workmanship under normal use for one year from the date of purchase. WarBird, at its option, will at no charge repair, replace or refund the purchase price of eyewear that does not conform to this warranty. This warranty is valid only in the United States and Canada and extends to the first purchaser only and is not transferable.

EXCLUSIONS: This warranty does NOT cover defects or damage resulting from misuse, accident or neglect, improper operation or alteration, or cosmetic or surface damage such as scratched lenses or accidentally broken frames.

DAMAGES OR DEFECTS RESULTING FROM SERVICE WORK PERFORMED BY SERVICE CENTERS NOT AUTHORIZED BY WARBIRD ARE NOT COVERED BY THIS WARRANTY.

4SHADOW

See the World Through a Lens of Uncompromising Clarity and Protection

It's not just a name, 4shadow™ is a promise. Built upon four unwavering pillars that redefine the way you see and interact with the world around you.

Impact resistance for unbreakable confidence that stands firm

Polarized to cut through the glare and provide unwavering clarity*

High resolution creates razor sharp vision and brings every pixel to life.

99.99% UV protection offers an impregnable defense that shields your eyes.

*not available on photochromatic and yellow tinted lenses.

Kaiwall™

Sustainable Strength, Uncompromising Performance

**MADE OF
RENEWABLE
PLANT-BASED
MATERIALS**

Protecting your world includes respecting our environment.

Kaiwall frame technology seamlessly blends cutting-edge performance with eco-conscious sustainability. It's made from a lightweight, high-performance material using up to 54% bio-content reducing its environmental impact by up to 75% compared to traditional crude-oil based polyamides. Now you can look good and feel good about your choice.

High flexural strength for incredibly resiliency.

Impact resistance for protection against drops and impacts

Chemical resistance helps maintain their pristine look for the long haul.

Excellent surface quality for that sleek, and stunning look.

Lightweight means comfort you can wear all day long.

Environmentally friendly - made with 54% bio-content.

ANSI Z87.1+

Safety shouldn't be a compromise.

**OSHA
COMPLIANT**

That's why WarBird is proud to offer a wide range of eyewear that meets the rigorous ANSI Z87.1+ standard for impact protection. Your WarBird shades have been battle-tested, withstanding high-velocity projectiles, flying debris, and other workplace hazards to emerge victorious. WarBird eyewear that bears the Z87.1+ marking on the lens and frame meets the highest safety standards adopted by the Occupational Safety and Health Administration (OSHA)*.

*Not available on all models. Check product markings for product specific ratings.
