# Introducing Philips HeartStart FR3

## Making lifesaving faster, easier and better for the

When sudden cardiac arrest (SCA) strikes, time matters. You need our best professional-grade AED yet – one that's rugged, reliable, and easy to use. The HeartStart FR3 is designed to give you the best chance in your toughest race. It's exactly what you would expect from Philips, the worldwide AED industry leader.

### Easier

Helping make  
your job easier

### Faster

Helping you start  
delivery of the right  
therapy faster

**Automatically powers on** by opening the HeartStart FR3 carry case\* so you can focus on pad placement from the start.

**Peel and place SMART Pads III.** There's no foil pouch when the pads are pre-connected, speeding deployment time.

**Quick Shock** minimizes CPR interruptions and speeds shock delivery.

**Use the same SMART Pads III for adults and children** for faster pediatric cardiac arrest response.

**Infant/Child Key** automatically decreases the defibrillation therapy and implements the configured infant/child CPR protocols.

# Defibrillator

## professional responder

**Smallest and lightest (3.5lbs, 1.6kg) professional-grade AED** among leading global manufacturers\*\* makes the HeartStart FR3 easier to carry along with other equipment.

**Protection against dust and jetting water (IP55)** gives you confidence the HeartStart FR3 will be rugged enough to withstand your physically demanding work environment.

**Over 90 daily, weekly, and monthly automated self-tests**, including pads integrity, help make it easier to ensure the HeartStart FR3 will be ready when needed.

**Ready-for-use visual indicator** flashes a green light making it easier to confirm the HeartStart FR3 is ready.

**Long-life battery** typically delivers 300 shocks or, if configured, 12 hours of monitoring to give you confidence that the HeartStart FR3 will be ready when needed.

**Bright, high-resolution color LCD** makes the HeartStart FR3 easier to use in a noisy environment.

**Bilingual configuration** makes it easier to use the HeartStart FR3 in bilingual work environments.

**Extensively upgradable** to take advantage of Philips advancements now and in the future.

**Standardize on one pad set for your program** as SMART Pads III are compatible for use with the HeartStart FR2-Series and Philips monitor/defibrillators, including the HeartStart MRx and XL Series, for easy hand-off.

## Better

Helping support a culture of excellence

**Download events** to responder or station computers, while keeping devices in the field, via an FR3 data card or Bluetooth wireless.

**Automatically route events** from responder's computer to your medical director or cardiologist, based on workflow, with HeartStart Data Messenger.

**Append a defibrillator event** to any electronic patient care reporting (ePCR) enabled with the Philips Data Software Development Kit.

**Review, annotate, print, and store AED events** for timely retrospective responder feedback with HeartStart Event Review.

**Perform more in-depth event review** and overall system-wide response analysis with the comprehensive Event Review Pro.
