

PART NUMBER(s): WKP-CADSMM

- Rear billet engine / transmission mounts
- Proprietary material & dimensions
- Outperforms OEM and other aftermarket mounts
- Reduces engine / drivetrain alignment and wear
- Lifetime warranty

Our front & rear engine / billet trans solid mount kit a is a preventative maintenance item designed to reduce engine / trans movement to zero, unlike the soft OEM rubber mounts. OEM mounts tend to wear out and cause engine, transmission and driveline movement; that movement will cause less throttle response, reduce horse power and torque to be transferred to the wheels. These mounts also reduce wear to the oil seals, driveshafts and differentials by keeping the engine and driveline inline. Delrin will not be as harsh on vibration felt through the machine like other billet aluminum mounts. This kit replaces the Can Am OEM mount, part #: 707001170 (Vibration Damper Mount).
