Voice Guide

Listen to the voice guide from the **Edge**^{plates} to select the type of water you would like to use along with other settings!

DM 1st Filter

DM Ultra Filtration

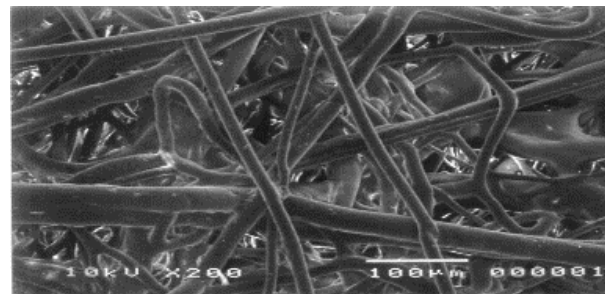

Powerful Filtration

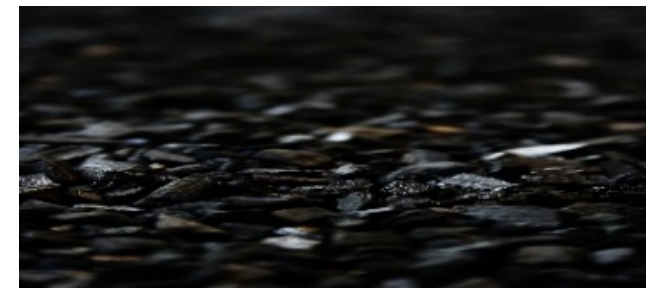

The Industry's BEST filters produce the purest water with TM-Ceramic and Carbon Block filtration!

- With membrane multi-layer filtration, the **Edge** Water Ionizer removes suspended solids over **0.5~5 micron** such as **rust, mud, sand, and sediment**. Due to the nature of the depth-filtration process, the filtration performance and product life span is incomparably outstanding!
- Since synthetic resin binders are not used, input **carbon can be utilized 100%**!
- Traditional carbon block filters are known for problems where carbon breaks away due to a decrease in binding force. Since Tyent applies an M/B filter core on the inside, our filters **prevent carbon from breaking away**.

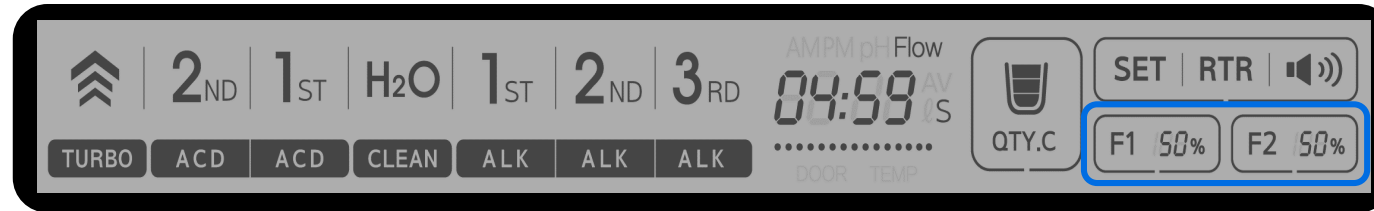

TM-Ceramic

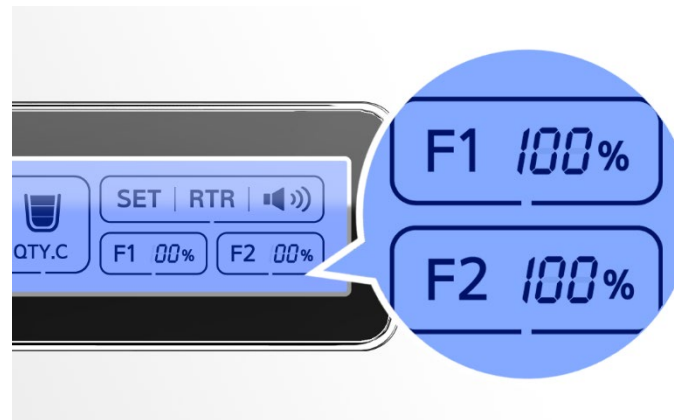

Carbon Block

The Edge plates features the easiest way to REPLACE your filters!

The display indicates the filter usage on the LCD screen allowing you to know exactly when it's time to change your filters!

When it's time, a simple filter replacement system along with a one-touch filter usage reset setting makes filter management easy for anyone!

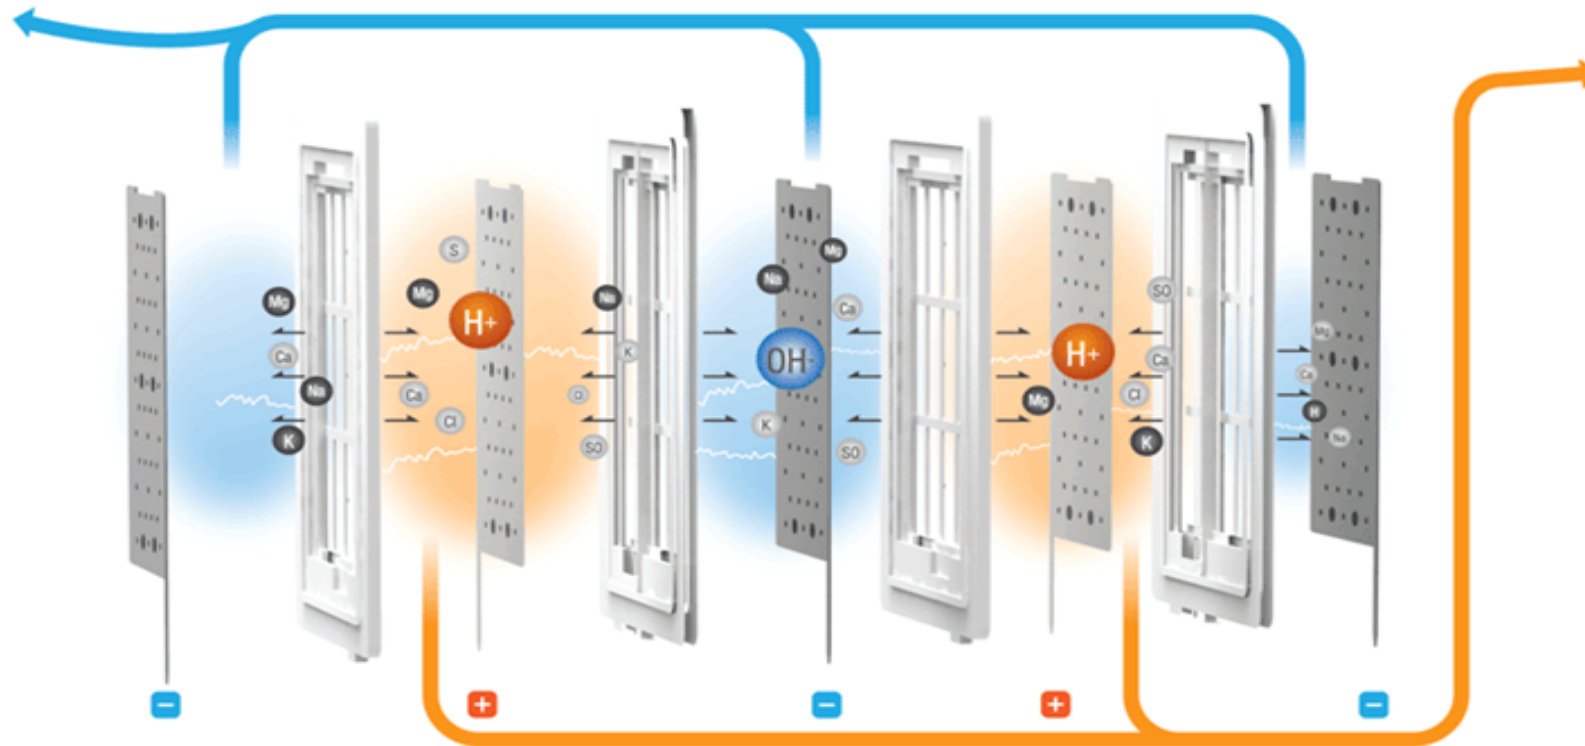

Outstanding Electrolysis

Experience the most powerful electrolysis that works stably with platinum-coated ROUND-MESH-HYBRID plate technology!

A SMPS supports the electrolysis to be operated in a stable condition. In addition, a broad surface area enhances the efficiency and effectiveness of plates.
