EPIC PRO CERAMIC COATING

EPIC® PRO Ceramic Coating is designed for the ultimate vehicle finish. This specially formulated coating provides years of protection and the industry's highest gloss finish. When professionally installed, the EPIC Ceramic System will bond with the vehicle clear coat to create a durable, hydrophobic surface. This coating will prevent dirt, water spots, and contaminants from adhering to paint, therefore prolonging the life and ease of cleaning for any vehicle. This system will change the way you care for your vehicle, while adding value and longevity.

If you are spending the time and money to correct your paint and bring out the true brilliance of it, make sure it stays that way! The only way to protect and maintain that show car finish is with the EPIC Ceramic Coating System.

- **What is EPIC PRO Ceramic Coating?**

EPIC PRO Ceramic Coating is designed to apply over a vehicle clearcoat to create a glass-like solid surface. This coating not only provides extreme gloss and paint depth, but also protects the surface below, prolonging the life and brilliance of your paint.

EPIC Ceramic Coat System features everything needed to properly coat a vehicle:

- EPIC® Prep Wash (#109608)
- EPIC® Final Prep Wipe (#190716)
- EPIC® PRO Ceramic Coating Single Use Kit (#109330)
- EPIC® CR2 Hydro Protect Ceramic Spray (#109416)
- Ultra-soft Edgeless Microfiber Towel (#800136)

- **How is EPIC PRO Ceramic better than wax?**
The EPIC PRO Ceramic actually bonds with the clearcoat providing years of protection.
- **What does the EPIC PRO Ceramic protect my vehicle from?**
This coating not only repels water and dirt from sticking, but it also prevents hard water, acid rain, environmental contaminants and bird droppings from etching the clearcoat.
- **How do I care for my EPIC PRO Ceramic coated vehicle?**
To ensure the coating cures properly, the installer should keep the freshly treated car indoors at least 12 hours after installation.

It is ideal to avoid washing the vehicle for the first 7 days. Hand wash or use touchless car washes to prevent premature wear of the coating.

To maintain the best protection and longevity Malco® recommends applying the EPIC CR2 Hydro Protect Ceramic Spray at least every 6 months.
- **How long will EPIC PRO Ceramic last?**
Malco warrants the system for 3 years or 36K miles.
