

# Classic Cantilever Slide Gate

The Classic type of Cantilever Gate utilizes 2 mounting posts and 4 bolt-on rollers which hold the gate in place and allow it to roll open and closed.

For adequate balance, a back-frame equal to 60% of the driveway opening is needed. The back frame will be bolted to the main gate frame onsite by the installers.

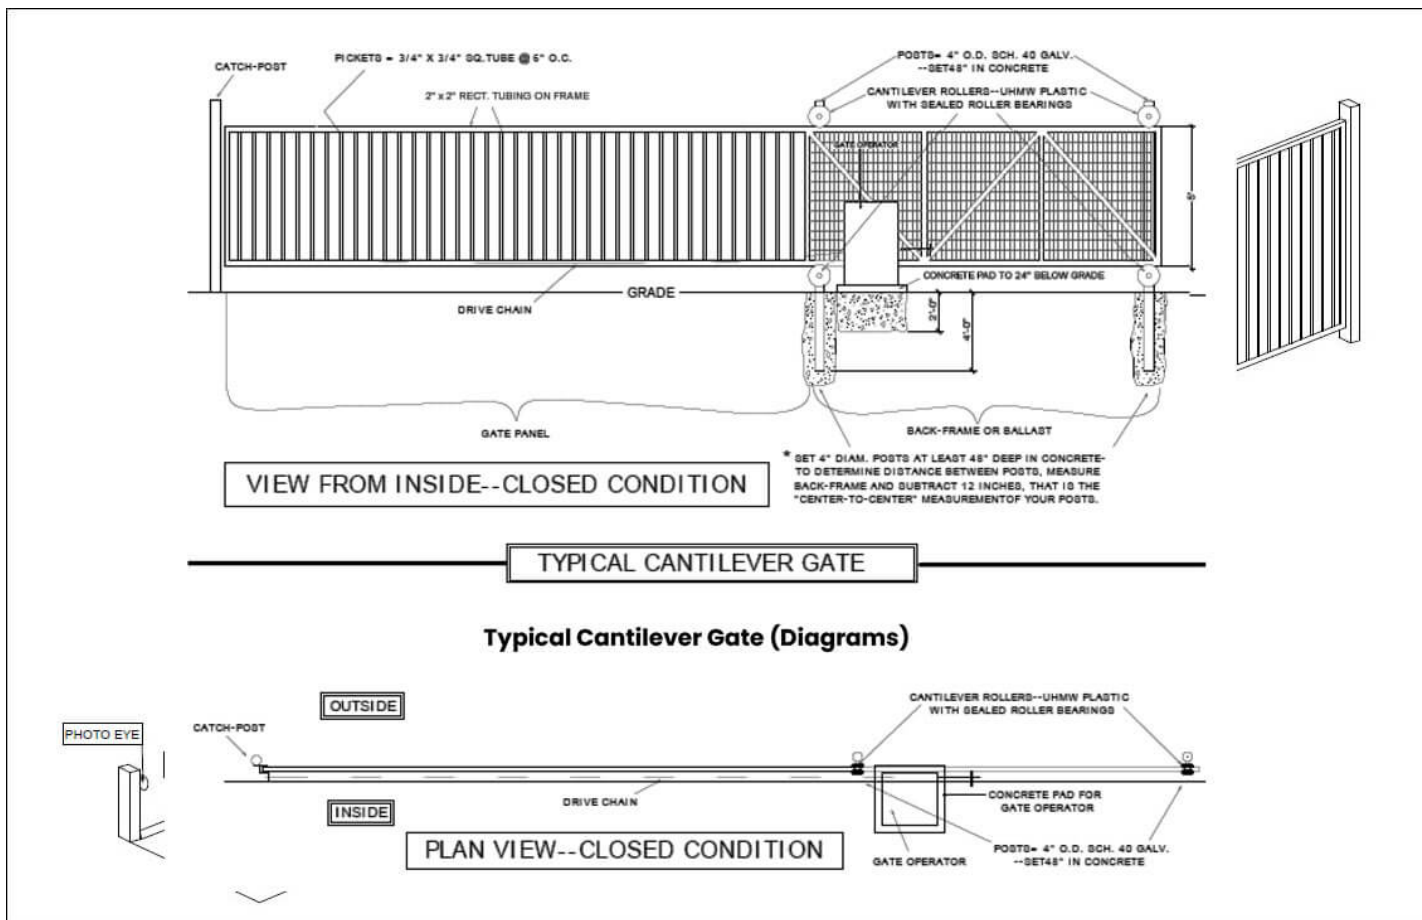

**Comes in semi-gloss black, may be ordered in white or bronze**

**Simple and easy installation**

# Typical Cantilever Gate

## Standard Cantilever System Requires:

- Telluride or Athena Gate with mesh backframe equal to 60% of opening
- Four UHMW sealed bearing rollers
- Slide gate operator from Amazing Gates
- Two 4" round cantilever posts (HDG)

**Our trained sales reps will walk you through the options and put together a quote for your next slide gate project .
