

Color Guide

Ecological products for more than 50 years

EN 71-3

The migration of metals (As, Hg, Se, Cr, Sb, Cd, Pb, Ba) of the sample was tested according to EN 71 Part 3 2013. There was no evidence for migration of the named metals above the limit of detection (10-50 ppm). All products for the interiors are correspondingly suitable for toys.

Danish Indoor Climate Labelling

Danish Indoor Climate Labelling is a voluntary labelling scheme for products and materials which are able to document degassing. Indoor climate labelled materials are a natural component of sustainable construction, where good indoor air quality contributes to social sustainability.

VOC

The VOC Directive, devised by the European Parliament and the Council of Europe, defines the directive limiting emissions for certain pollution causing volatile organic compounds, called VOCs. All WOCA Denmark products meet the VOC Directives for 2007 and 2010.

DIN EN 14904

WOCA TS 2K Finish has been tested according to DIN EN 14904. This European Standard specifies requirements for surfaces for indoor facilities for multi-sports use.

A+

Since September 2013, all floor coating products marketed and sold in France are obliged to be labelled with a VOC classification ranging from grade A+ (very low emissions) to grade C (high emissions). The aim is to improve indoor air quality in both private and commercial buildings. This regulation enables consumers to select environmentally friendly products as well, as the grade A+ guarantees an emission of volatile substances below the limit value after 28 days – a limit value identical with the one prescribed by the Center of Competence in Civil Engineering (DIBt).

The Green Dot (Der Grüne Punkt)

The Green Dot ["Der Grüne Punkt"] is a protected trademark of Der Grüne Punkt – Duales System Deutschland GmbH. It indicates to the end consumer that the manufacturer of this packaging has fulfilled the requirements of the Packaging Ordinance. According to the Packaging Ordinance, manufacturers and distributors who are first dealers of sales packaging which typically accumulate at the private end consumer are obliged to participate this in a dual system (for example, Der Grüne Punkt – Duales System Deutschland GmbH). The task of this privately organized company is the collection, sorting and recycling of used sales packaging.

Anti Slip Test DIN 51130

WOCA Diamond Oil Active, Exterior Wood Oil, Invisible 2K, TS 2K Finish and UV Oil 510 have been tested on solid wood, and achieved a R10 classification according to DIN 51130. For more information, please contact WOCA Denmark A/S.

DIBt regulation

Our industrial products are all registered by DiBt for manufactures selling to the German market.

Fire Classification EN 13501-1:2018

WOCA XP 2K Finish has been tested according to EN 13501-1:2018 and achieved a Bfl1-S1. For more information, please contact WOCA Denmark A/S.

IBR

WOCA Denmark's products are tested in neutral laboratories, e.g. by the Institute of Biological Building Materials in Rosenheim and are approved and certified. The impact on the health of people and environment of the methods of production and the products that are used for building, furnishing and living is examined.

Suitable for food contact

WOCA Maintenance Gel and Worktop oil has been tested for specific migration, MOSH/MOAH, NIAS and sensory properties for 2 hours at 40° C in worst case simulations.

The WOCA Color Guide features the possibilities with WOCA Pretreatments and pigmented Oils.

Each wood panel shows the Pretreatment [Lye and/or Precolor] and Basic Treatment [Oil]. Wood panels in this guide are made of European Oak and Larch.

Wood is a natural resource, therefore results vary when using WOCA products. WOCA recommends testing with Pretreatment and Oil samples to ensure desired results.

The WOCA System

*Lye and PreColor are optional

Master Colour Oil

Give your floor a very special character with Master Color Oil. With the high-quality oil, you achieve color and protection in one single product. Master Color Oil delivers a high resistance to dirt and liquids, lets the wood breathe and at the same time highlights the wood's beautiful, natural properties. You do not have to be limited when it comes to colors, because the color palette is large when it comes to Master Color Oil. Master Color Oil is not only ideal for floors, but it can also be used to on panels, rafters etc. The oil is indoor climate certified, and you therefore achieve both a healthy working climate during application and a healthy indoor climate afterwards. Whether you need to apply oil to new, untreated, or freshly sanded surfaces, the durable oil is ideal for all types of wood.

How to do

1. Thoroughly shake the container of Master Colour Oil, both before and during use. Containers with different batch numbers should be mixed to avoid colour mismatch.
2. Apply the oil using a short-bristled paint roller (4-6 mm) in an even coat. Work in small areas of no more than 100 sf at a time.
3. Leave the oil to be absorbed for 10-15 minutes. If the oil soaks quickly into the wood, apply more oil.
4. Polish the oil into the wood until the surface appears saturated. Use a buffing machine with a buffing machine for large areas and a polishing cloth/pad manually for small areas.
5. Remove excess oil with dry, lint-free cotton cloths or pads until the surface no longer appears wet. Continue until the whole area has been polished and excess oil has been thoroughly removed.
6. To ensure a good saturation the surface should be re-polished with 3 oz Master Colour Oil per 100-120 sf within 12-24 hours at 68°F after the first application. The oil should be polished thoroughly, as described in step 4+5.
7. The surface can be used with caution after and is fully hardened after at 68°F and 55% humidity, af-ter which rugs etc. can be placed on the floor.

Application area

For untreated, new or newly-sanded wooden surfaces.

Product description

Master Colour Oil provides colour and protection in one product. The oil penetrates the wood and ensures a hardwearing surface with high resistance to water and dirt. It is perfect for indoor use on all unfinished, new or newly-sanded surfaces in all wood species..

Sustainability is

in
our
nature

Diamond Oil Active

Your wooden floors and furniture deserve the absolute highest quality when it comes to oil treatment. Diamond Oil Active is both sustainable, odorless and extremely strong. The product is based on natural oils, which means that Diamond Oil Active is VOC Free* and indoor climate certified. All of this ensures a great working environment when the oil is applied and a healthy indoor climate afterwards. The oil gives your wood products an extremely beautiful surface that enhances the woods natural glow and structure while providing it with a breathable surface. Diamond Oil Actives unique hyper cross link technology gives the 1-component oil and abrasion resistance compatible to a 2-component oil. The oil contains raw materials of the highest quality which means that the oil is easy to work with and has an extreme durability. With Diamond Oil Active you achieve a non-slip and water repelling surface which is also very resistant towards marks and scratches. If your flooring and furniture is treated with Diamond Oil Active, they become easy to maintain and clean.

How to do

1. Wash the floor with Intensive Wood Cleaner. Leave the floor to dry for at least 24 hours at 68°F before applying the oil.
2. Thoroughly shake the container of Diamond Oil Active, both before and during use. Containers with different batch numbers should be mixed to avoid colour mismatch. Apply the oil using a short-bristled paint roller in an even coat.
3. Leave the oil to be absorbed for 10-15 minutes. If the oil soaks quickly into the wood, apply more oil.
4. Polish the oil into the wood until the surface appears saturated. Use a buffing machine with a buffing machine for large areas and a polishing cloth/pad manually for small areas.
5. Remove excess oil with dry, lint-free cotton cloths or pads until the surface no longer appears wet.
6. If an extra-attractive finish and resistance is desired, the floor can be repolished with 3 oz Diamond Oil Active per 100 sf within 8-10 hours of the first application. The oil should be polished thoroughly, as described in 4+5.
7. The floor can be used with caution after 24 hours.
8. Clean tools with WOCA Solvent or Turpentine.

Application area

For untreated, new, or newly-sanded wooden surfaces.

Product description

Diamond Oil Active is a sustainable, VOC free oil for a high level of quality when oiling their wooden floors, tabletops and furnitures. This exclusive, single-component, low-odour, extremely hard-wearing floor oil is made from natural and high quality materials. It is very easy to work with and assures minimal waste. Diamond Oil Active's unique hyper cross linking technology will give your wooden floor a comfortable, non-slip surface that is extremely water repellent and easy to clean and maintain. The oil has a dry matter content of approx. 99% and is suitable for machine-application when oiling untreated, new or newly-sanded wooden surfaces in all species of wood. * VOC <1% - Natural, Extra White and White
