

WOCA Oil Commercial Care Guide

1. Daily/Weekly **WOCA Commercial Soap**

Sweep or vacuum area regularly. Damp mop using WOCA Commercial Soap. Or use the WOCA Spray Mop.

- For damp mopping with a mop and bucket, dilute 1 cup/2.5 gallons of water.
- For the WOCA Spray Mop, add 2 capfuls of Commercial Soap to the tank and fill with water.

2. Monthly- **WOCA Oil Refreshing Soap**

WOCA Oil Refreshing Soap is a partner to the WOCA Commercial Soap. WOCA Oil Refreshing Soap combines efficient cleaning with oil rejuvenation, as additional oil penetrates the wood and reinforces the existing oil finish.

Damp mop using WOCA Oil Refreshing Soap. Or use the WOCA Spray Mop.

- For damp mopping with a mop and bucket, dilute 3 oz/gallon of water.
- For the WOCA Spray Mop, add 2 capfuls of Oil Refreshing Soap to the tank and fill with water.

3. Yearly- Re-Oiling Maintenance Options

Option 1 **WOCA Commercial Cleaning Oil**

- Clean and re-oil with 1 product and a waterless process. Dry time: 3 hours. Full cure: 24 hours. Ideal for businesses that cannot temporarily close.

Option 2 **WOCA Maintenance Diamond Oil Active** (matte sheen) or **WOCA Maintenance Gel** (satin sheen) Re-oiling is a 2 step process.

- Prep with WOCA Intensive Wood Cleaner and re-oil manually or by machine. Full cure: 2-3 days.

****If the floor is factory finished, always comply with the manufacturer's care and maintenance instructions.***
