

WOCA Oil Residential Maintenance Schedule

1. Daily Maintenance (if necessary) – **WOCA Natural Soap Spray Bottle**

Spot Spray any affected areas and wipe with dry cloth/mop.

2. Bi-weekly (Every 2 weeks) **WOCA Natural Soap**

Sweep or vacuum area regularly. Damp mop using WOCA Natural Soap. Or use the WOCA Spray Mop.

- For damp mopping with a mop and bucket, dilute 3 oz/gallon of water.

3. Quarterly (3-4 times year) **WOCA Oil Refreshing Soap** (formerly named Oil Refresher),

Oil Refreshing Soap works in conjunction with WOCA Natural Soap to provide both effective cleaning and rejuvenation to your wood surface. Its unique formula penetrates the wood, reinforcing the existing oil finish and leaving it refreshed and revitalized.

Damp mop using WOCA Oil Refreshing Soap. Or use the WOCA Spray Mop.

- For damp mopping with a mop and bucket, site finished oiled floors and oxidative oiled floors: dilute 6 oz/gallon of water.
- For damp mopping with a mop and bucket, UV oiled floors and hardwax oiled floors: dilute 3 oz/gallon of water.

4. 2-8 Years Based on Lifestyle, Traffic & Care. **WOCA Maintenance Oil Diamond Active or WOCA Maintenance Gel.**

Maintenance Oil Diamond Active is a matte sheen. Maintenance Gel is a satin sheen.

- Prep with WOCA Intensive Wood Cleaner and re-oil manually or by machine. 2-3 day cure time.

****If the floor is factory finished, always comply with the manufacturer's care and maintenance instructions.***
