

GALILEO

HOB EXTRACTOR RANGE

 **FABER**

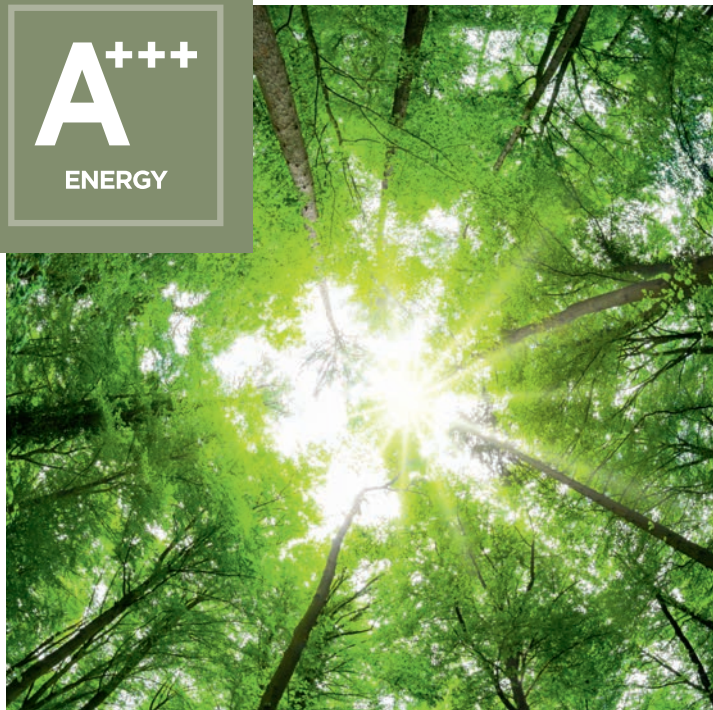

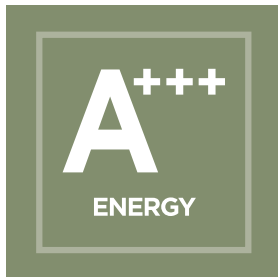

FRANKE'S AIR EXPERT

UNEXPECTED
COMBINATIONS
COMPLEMENT
EACH OTHER
BEST

**Flex your cooking skills in the kitchen
with the Faber Galileo hob extractor.**

Two top tier Faber appliances combined
to offer the latest in air technology
and maximum convenience, along with
a distinct aesthetic that's the talk of the table.
Available in eight unique models.

IN HARMONY WITH THE ENVIRONMENT

All Faber hoods are classified with high energy classes ensuring maximum performance and efficient energy consumption when it comes to motor operation, filtering and lighting. The Galileo NG is top of the range in terms of efficiency and reaches excellence in class A+++.

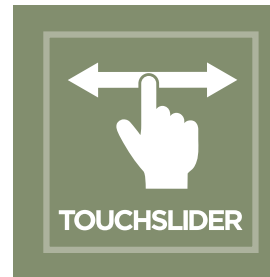

POWERFUL YET SILENT

With a powerful extractor that ranges up to 700 mc/h and silently removes vapours from the cooking area, minimal distractions can be expected when entertaining. With A+ to A+++ energy efficiency rating thanks to using precisely the amount of energy needed.

The jewel of your worktop

SIMPLICITY AT YOUR FINGERTIPS

The touch slider controls featured are convenient to use and reactive, offering power fast with maximum safety and minimal noise.

The Galileo Stripes model stands out with absolute elegance and features white touch sliders, elegant silk-screen prints that give character to cooking zones and geometry that integrates with the central suction grill making this model ideal for high end kitchens.

OPEN KITCHEN AMBIENCE

With two appliances combined there's more space to indulge in when preparing recipes and enjoying conversations. You can even insert a drawer directly underneath which is ideal for freeing up the work surface.

A FLEXIBLE APPROACH

Two cooking zones can be bridged and activated at the same time to create a larger cooking surface area, making it easy to operate large pots and dishes such as fish bowls or braising pans.

UP THE INTENSITY

An additional suction feature to create Double Intensive performance ensuring all vapours and the most persistent cooking odours are eliminated quickly.

AN AIR OF TRANQUILITY

Removes cooking odours and vapours effectively in just a few minutes. With 9 levels of aspiration also allows you to easily control power according to your need.

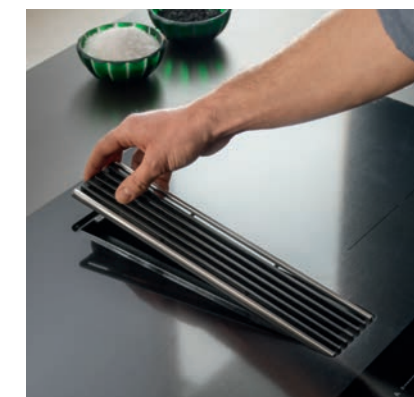

WELCOME CONVENIENCE

Waterproof technology ensures safe operation even if liquids spill onto the worktop. Any liquid is also conveniently collected in a small compartment underneath which can then easily be removed and emptied.

EASY TO CLEAN

Thanks to the flush design of the central intake grid, there are no spaces for dirt to settle when cooking which means when it comes to cleaning after usage, all it takes is a simple cloth and a quick wipe.

GREASE FILTER

The anti-grease filter has an excellent performance while also being the first barrier that can collect up to 0,5l of water spills. It is easily removable and washable in the dishwasher.

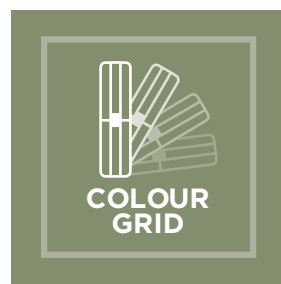

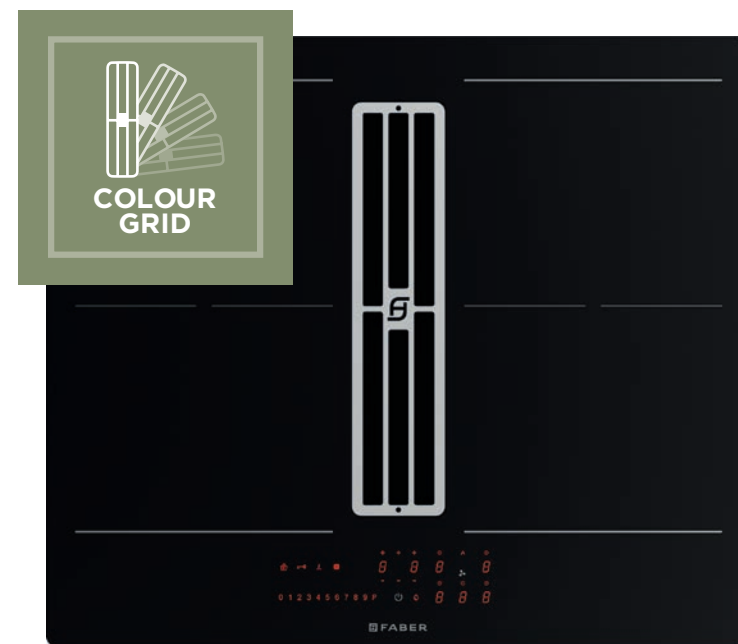

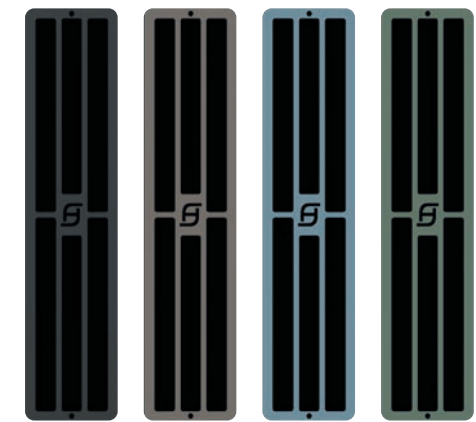

Cooking and living spaces elegantly co-exist

MINIMALISTIC DESIGN

Welcome sleek design that perfectly blends kitchen and living spaces for an open kitchen ambience, allowing you to entertain guests and perfect recipes at the same time without distractions as unwanted smells or fumes.

The smooth waterproof surface is not only easy to clean but adds a distinct, contemporary feel to your kitchen aesthetic, and for a particular streamlined look, the hob can even be installed flush with the surface. Small details that inspire cooking precision and kitchen elegance.

To make a statement choose the Galileo Slim model, for which the grid is available in five stunning colors: Dark Grey Matt, Titanium Matt, Dusty Blue Matt, Dusty Green Matt, and Grey Aluminium, allowing you to personalize your cooking space like never before

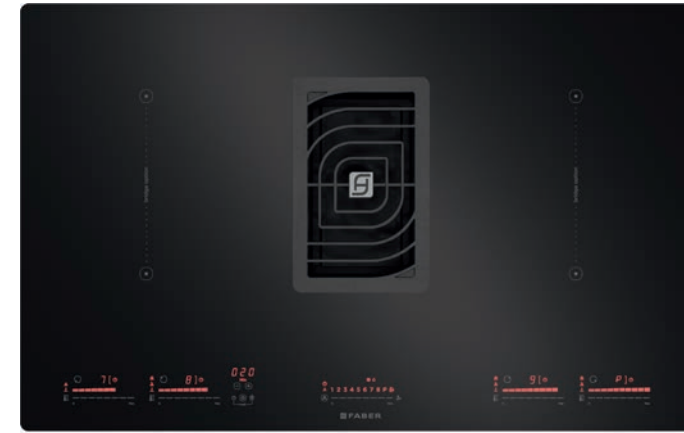

MEET THE RANGE

CHOOSE THE BEST ONE FOR YOUR NEEDS

DIFFERENT INSTALLATION METHODS, READY TO MATCH ALL YOUR NEEDS.

Installations available for models:
GALILEO GLASS
GALILEO NG
GALILEO SMART
GALILEO 60

CERAMIC FILTER

The ceramic filter* is capable of not only absorbing, but purifying air while cooking in an efficient way. What's more, if it's removed and placed in the oven at 200°C every 2-3 months, the device is able to regenerate and last up to maximum of 5 years.

*The ceramic filter is included in the H60 or H100 installation kit.

MODE OF INSTALLATION

REAR EXIT

To be completed by yourself as the installer, depending on the space you have available.

ASPIRANT WITH 360° EXIT

The kit features a pipe that reaches the floor. The rest tube that conducts air outside the house must be ordered carefully with the installer who must choose between exit on the right, on the left or rear.

OUTLET FILTER AIR IN HOOF

Choose the following H60 and H100 kits. Both kits include the pipe leading up to the escape airless in hoof. Includes the ceramic filter for cooking odour filtration.

Installations available for models:
GALILEO STRIPES
GALILEO BOLD
GALILEO LINEAR
GALILEO SLIM

CHARCOAL FILTER

In the filtering version, Galileo is equipped with high performance charcoal filters*, which can be easily removed from the top, can be regenerated in the dishwasher, this having less impact on the environment.

*The carbon filter is included in the filtering version of the aspiration hob.

MODE OF INSTALLATION

REAR EXIT

Solution included with the product available for both installation, recycling and aspirant.

ASPIRANT WITH 360° EXIT

The kit features a pipe that reaches the floor. The rest tube that conducts air outside the house must be ordered carefully with the installer who must choose between exit on the right, on the left or rear.

RECYCLING WITH OUTLET IN THE PLINTH

Choose the following H60 or H70 kits. Both kits include the pipe leading up to the escape airless in the plinth.
