

Coffee Tamper Guide

This table serves to provide a general guide only and is not regularly updated.

For this reason, we recommend that you check your machine specifications by searching the name/make of your coffee machine online to confirm the correct tamper size base that you will require by reference to the portafilter size used by your machine.

If you are considering purchasing an Eazytamp 5 Star Pro, please consider the following:

- if you are using VST, IMS and other competition filter baskets inside your portafilter, these baskets can take a 58.4mm tamper;
- for portafilters which require tampers with diameters of 54mm or less, we recommend purchasing a base that is 5mm thick.

Coffee Machine	Tamper Size
Ascaso	57mm
Astoria	58mm
Astra	56mm
Aurora	56mm
