

Golf Trolley Remote Control Sync Process

Please follow steps below to sync remote with your EPG remote golf cart.

This is used to align the caddy frequency with an out-of-tune or replacement remote control or new control box.

Step 1 - Make sure the cart power is totally off for at least five (5) seconds.

Step 2 - Hold down the stop button on the remote. **DO NOT RELEASE THE STOP BUTTON FROM NOW, TILL THE WHOLE SYNC PROCESS COMPLETED.**

Step 3 - Power up cart. Continue to hold down the stop button.

Step 4 - Continue to hold down the stop button until the lights on the LED screen blink.

Step 5 - Cart is now in "sync" test each function to assure all are functioning.
