Vehicle Make & Model	Model Year(s)	Keyline Clonable Key for use with 884	Keyline Transponder Key	Chipless Shell Available	On-Board Programming Letter	994 Jaw	Code Series	Keyway (HS=High Security)	Notes

CLONING INFO = Keys that require an existing working key to the vehicle and a transponder cloning tool such as the 884 Decryptor Ultegra to program the clonable key to the vehicle.

Keys listed in the **KEYLINE R/W KEY** column are listed with TK100 universal head and also with an alternate head type in parentheses for users with the Repli-Code 7 TX or equivalent cloning tool (i.e. B106UTK100 or TK60).

APPLICATION CHART KEY

* = Optional transponder system for some or all of the years listed

** = These vehicle make and model years use two possible key blanks; check profile OR chip type of original key blade to determine correct replacement key

NOTE for Repli-Code 7 TX for Ford vehicles:

Ford remote head keys require a transponder read before programming. Insert existing key into Repli-Code 7 TX; if "Texas Crypto 1 TC08" displays, key can be programmed.

If "Texas Crypto 3 TC06" displays, key CANNOT be programmed with the Repli-Code 7 TX.

GM Vehicles Part Number Change:

BB112-PT C+ = B111-PT

B111-PTS = GM recall key version of B111-PT with smaller key hole

Ford Part Number Change:

BJ92-PT = BH92-PT

BJ94-PT = BH94-PT

Please visit www.keyline-usa.com for the most current information as applications may be updated periodically after print
