

April 5, 2021

Dear customers,

By this letter we confirm that the TrioMed Active Mask and Medical wound care products do not contain any Graphene nor any other types of particulates/nanoparticulates such as copper, salt, silver, zinc or others. The TrioMed Active Technology in Masks and Wound care has been in use for more then a decade and tested against the most stringent protocols both in efficacy and safety that are required for medical devices.

Natalie Lapierre Managing Director triomed@triomed.com
