**[2021+ Tesla Model 3&Y]**

**Thank you for purchasing our products! Please contact us for any issues!**

## Parts List:

- 4 Self Drilling Screws
- Small Cross Screwdriver
- Punching Cone

**STEP 1** When you receive this product, we recommend that you should check the accessories before the instruction.

**STEP 2** The combination should be set with the **DOOR OPEN** in order to test the lock combination effectively without locking yourself out.

**STEP 3** Clear out the contents of the center console for now, including the factory mat at the bottom of the console.

**STEP 4** Orient the safe so that the lock is towards the rear of the vehicle. Place the Console Vault safe inside the front compartment of the console.

**STEP 5** USB cable can be kept inside the console and use the Punching Cone to pierce the inner wall of the central console through the preloaded hole about **8-15mm**. **DOT NOT POKE PUNCHING CONE OVER 15MM!** This could lead to a puncture of the entire central console.

**STEP 6** Insert the **4 SELF DRILLING SCREWS** by hand, and use a Cross Screwdriver, complete tightening!

**STEP 7** Tighten each of the self-drilling screws until the screw head rests against the insert nut and **STOP! DO NOT OVER TIGHTEN**, Overtightening will damage the fitting.

**STEP 8** Enjoy your purchase!

## Tools Needed:

- Impact drill or Socket wrench
