

GINGER AND THE VEGESAURS

WATERMELONSUCHUS CARVING

Ingredients

- Watermelon
- Grapes
- Parsley

Tools

- A knife*
- Toothpicks
- Non-toxic marker

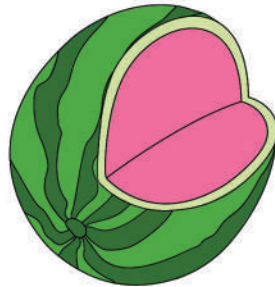

*Only an adult should be using the knife.

1o

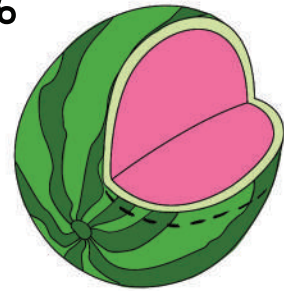

Use a non-toxic marker to outline the mouth.

2o

Carefully carve out the mouth.

3o

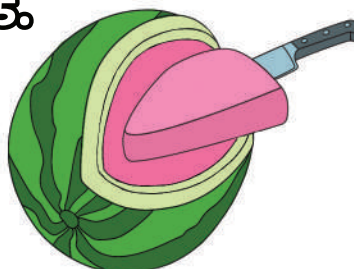

Make a new outline for the watermelon succhus teeth.

4o

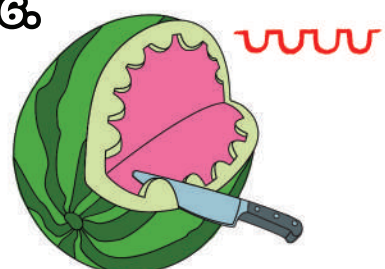

Carve out a thin layer of the watermelon skin to create the teeth.

5o

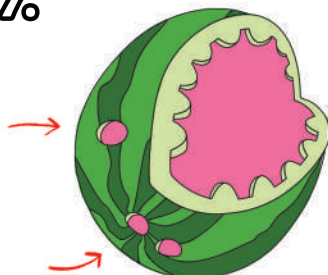

Carefully remove any remaining insides.

6o

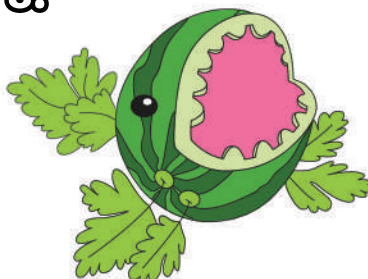

Carve out the teeth in a wavy "U" pattern.

7o

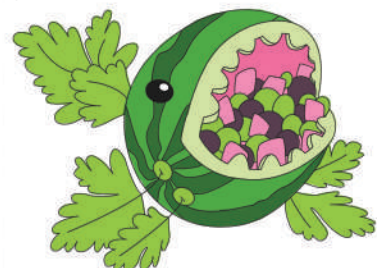

Carve out holes for the eyes and the fins. Add a tail fin hole in the back.

8o

Insert purple grapes into the eyeholes, green grapes and parsley in the fin holes.

9o

Fill the mouth with watermelon and grapes. Ta-da!
