

657945 Sizzix® Accessory - Embossing Diffuser™ 3PK, Set #1

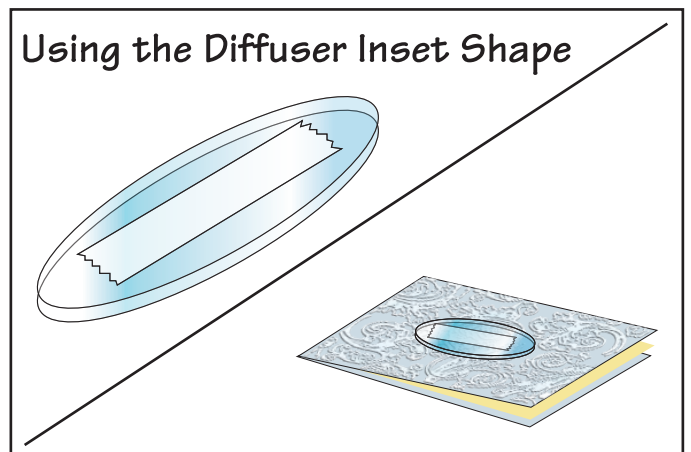

1. Build sandwich as illustrated. The Diffuser is used in place of one of the cutting pads. Never use Diffuser with more than one cutting pad!

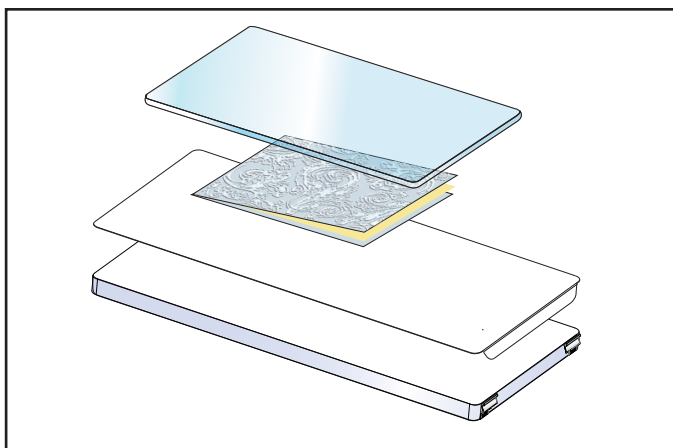

2. Align the Diffuser template with the closed end of the embossing folder. Insert into the machine open-end first as illustrated.

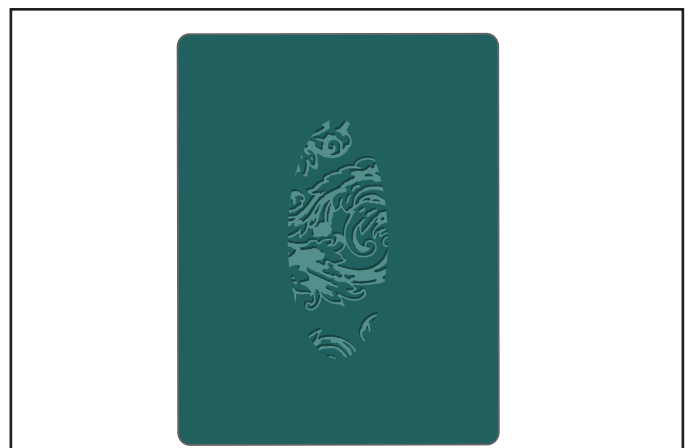

3. Only the area of the embossing folder that makes direct contact with the Template will be embossed. The inset will remain smooth.

1. Apply a piece of double-stick tape to the inset shape and adhere to the embossing folder in the desired location.

2. Turn the embossing folder over so that the inset shape is facing down. Place a single cutting pad on top of the embossing folder and insert into machine.

3. Only the area of the embossing folder that makes direct contact with the inset shape will be embossed.
