Most important symptoms and effects**Symptoms**

When concentrate is ingested in sufficiently large quantities, immediate burning pain in mouth, throat, abdomen and possible severe swelling of the larynx. Possible skeletal muscle paralysis affecting the ability to breath with circulatory shock, convulsions. May cause red blood cells hemolysis and possible liver and kidney injury. May be fatal. Circulatory shock possible if large quantities are ingested. Small unit dosed bag size would require the ingestion of multiple bags to reach the dangerous level. If misted in concentrated form can cause irritation of mucous membrane, nose, eye, and throat. In concentrate may cause dermatitis or irritation in some individuals upon prolonged contact. Localized skin defatting can be expected from any concentrated detergent on long contact. Causes painful stinging or burning sensation of eyes and lids, water of eye, conjunctivitis and in concentrated undiluted form may cause opaqueness blindness.

Indication of any immediate medical attention and special treatment needed**Notes to Physician**

Treat symptomatically.

5. FIRE-FIGHTING MEASURES**Suitable Extinguishing Media**
