WELCOME TO SALE 348

I am delighted to welcome you to Sale 348 – the second sale in Downies Australian Coin Auctions' 60th anniversary year!

A major landmark for Downies, our 60th anniversary year got off to a sensational start, with our first sale of 2023 a massive success. Trusted by a wealth of consignors, and continuing to expand our worldwide audience, I anticipate that Sale 348 will prove just as strong.

Notable for our 'seasonal' catalogue cover, celebrating Autumn, Sale 348 encompasses well over 3,000 lots. Featuring an extensive selection of Australian decimal & predecimal notes, predecimal & decimal coins and Australian & world stamps, the sale comprises a spectacular number of individual rarities. Headlined by a 1921 Square Penny Type 12, the sale includes an 1852 Adelaide Pound Type 1, a 1930 Penny, a Coombs/Wilson £1 Commonwealth Star Note Consecutive Pair and an Augustus Gold Quinarius – and more! Given the inclusion of a fantastic range of Ancients, world coins and military medals, the great variety underpinning Sale 348 will undoubtedly catch the eye of collectors around the globe.

As always, I would like to offer many thanks to Downies staff, who have been ceaseless in their efforts to ensure that Sale 348 continues our 60th anniversary year in style. Please note that our popular Live Auction Platform ([auctions.downies.com](https://www.downies.com)) will once again be up and running in Sale 348, and to keep up-to-date with our viewing and sale conditions, check our website, www.downies.com/auctions.

We still have two more 60th anniversary sales to be held in 2023, so it's not too late to be part of the auction action! We are still accepting consignments for Sale 349 in August, with the final sale of the year in October. If you are keen to sell part or all of your collection, we would love to hear from you.

To all of our collectors, I trust you enjoy perusing the array of material found in Sale 348. Enjoy your collecting!

ADVICE

FOR ABSENTEE & NEW BIDDERS

- As a bidder at our Public Auction, you will be able to decide the level at which you would like to purchase an item. To assist bidders in the preparation of their bids, the Auctioneer has set an “estimated market price” on each lot. This is a conservative guide to the market value of the items described, and you may bid above or below this estimate. Please note however, that bids below 60% of this estimate will not be processed.
- Purchase of lots on extension (extended payment terms) will NOT be permitted
- Our descriptions are complete and our grading is conservative. Our aim is to give you the best possible guide to the actual condition of the item you are seeking. We value our absentee bidders and believe that our grading and pricing policies work to the mutual long term benefit of both the vendor and buyer.
- Your bids will be executed in the strictest confidence by an official representative of the Company. They will be regarded as the maximum bids that you are prepared to pay and we will always try to purchase on your behalf at a price lower than your maximum bids given.
- On items that you anticipate the price may far exceed the estimate, we can offer you some flexibility in the execution of your bid. Obviously, you may submit a bid well above the estimate and this will be treated as your maximum bid (excluding the buyer's commission). Alternatively, you can place a conservative bid and, if the bidding far exceeds it, you can elect to increase that bid by a fixed percentage. The higher bid will only be executed if necessary, and strictly according to your instructions. Please fill in the appropriate space on the bid sheet if this is required.
- If you are interested in a number of lots, but only wish to spend a limited amount of money, please write down your bids and then clearly indicate, in the space provided, the maximum amount you wish to spend.
- If you are interested in a particular item, and there are two or more identical lots; you can clearly indicate on your bid sheet that you wish to bid for “one or more only” of the nominated lots on offer. This must be made very clear on the bid sheet.
- Remember, the benefit is yours by buying at Public Auction: you can decide exactly what you want to pay for any item, and bid to that level.
- In preparing your bids, it is important to note that a 22.0% buyer's commission including GST with a minimum charge per lot of \$10, is added to the knock down price of each lot. Do not add commission to your maximum bid.

**Remember that successful absentee bids at the same level will be awarded to the earliest bidder at that level – so bid early!
And please note that bids submitted by normal mail may be affected by recent Australia Post delivery policy changes.**

Gradings and terminology used in this catalogue

Proof: Proof coins are the most beautiful coins imaginable. They are struck using specially hardened dies, and highly polished blanks. The result is a coin of great clarity and depth of detail. Most modern proofs (1966 onwards) contrast a brilliant mirror background against delicately frosted detail.

Prooflike: Often a non-official mint strike, or medallic in nature.

Brilliant Uncirculated (B/Unc) or choice Unc: Uncirculated, but with higher than normal sheen.

Uncirculated (Unc): An uncirculated or unused item. Full detail, no wear, brilliance and lustre are hallmarks of an uncirculated coin, whereas no bends, folds or staining are qualities of an uncirculated banknote.

Extremely Fine (EF): Coins show only traces of wear to the high points of the design and only light surface marks from circulating. Otherwise the design is clear and sharp and the coin will have much lustre. Notes are clean and crisp with only the slightest signs of creases and folds.

Very Fine (VF): Lustre has gone and there will be flatness on the design of a coin. Other traces of wear may also be evident. Banknotes of this grade will show distinct signs of handling though the paper will still be reasonably crisp.

Fine (F): The effects of handling will be quite evident from the amount of flatness to the design of a coin. Notes will

have clear signs of soiling and heavy creasing, possibly also some tearing.

Very Good (VG): Most details of a coin's design will be all but gone, but the basic design and date are still visible. Notes of this grade are near the end of their useful life, and are of little value unless they are very scarce or rare.

choice: An exceptional example of the given grade.

good (g): Use of the prefix good (e.g. gVF) indicates that the item is slightly better than the grade stated.

about (a): Use of this prefix (e.g. aEF) indicates that the item is almost at the grading designated.

Purchaser Responsibilities

- The buyer of each lot is to be responsible for it from the time it is "knocked down". Payment is to be made in full with cleared funds before delivery or collection. The lot(s) are to be paid for by Australian buyers within two days of receiving the invoice, and by overseas buyers within 7 days of receiving the invoice. **A service charge of 2% per month will be added to all overdue accounts.** Failure to pay in full within the specified time also entitles the Auctioneer to re-sell the lots, with any resulting deficiency being made good by the defaulter.

Delivery/Collection of Lots

- Lots can be picked up from 3 Redland Drive Mitcham. No lots will be delivered to buyers without payment in full. Lots purchased on behalf of absentee bidders will be forwarded, fully insured, by the most practical method at the risk of the purchaser who shall bear **all costs** incurred. Absentee and room bidders may vary these delivery methods, but at their own risk. Such alterations must be advised in advance.

General

- Each lot is sold as genuine and correctly described. Unless described, all official packaging and relevant certificates are presented within the lot. The purchaser is at liberty to return the lot by giving written notice with seven days (or in the case of overseas buyers, within 14 days) of the sale, if he/she proves that the lot is not genuine or not correctly described. The onus on proving a lot to be not genuine lies with the purchaser. Proof of the inability of a recognised expert to express a definite opinion will not discharge this onus.
- Watches, instruments and devices with working mechanisms are verified to be accurately described. Whilst every care is taken to provide secure packaging for all items in transit, no responsibility may be assigned to the Auctioneer for lots which are described as being 'in working order' but are found to be not working at time of receipt. Such lots are sold "as is" and are not subject to return.
- No lot is to be rejected if subsequent to the sale it has been removed from its sealed holder and/or has been treated by any process, unless the Auctioneer's permission to subject the lot to such treatment has first been obtained in writing.
- No lot is to be rejected if the purchaser or their agent has inspected the lot prior to the sale, irrespective of whether or not any item or items are incorrectly described.
- Failure on the part of the bidder or purchaser to comply with the conditions stated previously, entitles the Auctioneer to cause the bidder or purchaser to forfeit any deposit held. Any uncleared lots may be re-sold by public or private sale and any resultant deficiency shall be made good by the defaulter.
- Bids from minors will not be accepted unless accompanied by a full cash deposit or suitable guarantee.
- Phone bids are most welcome but must be confirmed in writing well before the sale.

Viewing

Action taken by Melbourne stonemasons on 21st April 1856 led to the establishment of the Eight Hour Day - defined as 8 hours labour, 8 hours recreation, 8 hours rest - for workers employed on public works for no loss of pay. However, it was to be many years later that most other workers (including women and children) became eligible for the same conditions. In recognition of the precedent, the 21st of April was declared a public holiday in 1879 and commemoration marches were held from that year until 1951. SESSION 6

Thursday 18th May 2023, commencing 9am

Patterns and coinages; predecimal proofs;
Australian predecimal coins

Patterns and Coinages

- 2161** Pattern Square Kookaburra Penny 1921 Type 12 (4.53gms) virtually Unc Square pennies are recognized as historically significant and reflect a nationalist storyline in Australia's history, due to the time following World War I when the Labour government started a movement to reject the British coins for a more Australian representation, at the same time adopting a new shape, and new metal (Cupro-Nickel). The response, however, was below expectations, due to people's resistance to change and complications with implementing the newly-shaped coins *Est. \$30,000*

- 2162** Uniface reverse lead squeeze for the Charles and Diana 1981 Fifty Cents. This is clearly an Australian rather than UK trial die although it shows the date which is on the UK Crown. The head of Diana is in the foreground and the diameter is 31.5mm which is the diameter of the Fifty Cents. The most interesting feature is the die is circular. Was the mint contemplating the issue of a circular Fifty Cents? A fascinating item and possibly unique, Unc *Est. \$1,250*

- 2163** Pattern Dollar 1967 by Andor Meszaros with milled edge, usual light obverse brushmarks and minor reverse rim flaws else aFDC a nice example with attractive light grey toning *Est. \$1,500*

Some sheets can also inadvertently reach the market from the normal production run, but this occurrence is very rare. They differ from Specimen notes in that they do not carry the word "Specimen" or bear a specimen number in red.
