Aeratron AE2+ DC

World's Quietest Fan

The AE2+ design-patented ceiling fan features two captivating airfoil self-balancing blades that promise silent operation and aerodynamic perfection. Swiss-German engineered, the revolutionary AE+ range cools your environment without the traditional “drying” feeling you get from traditional ceiling fans. Not only does the Aeratron use less power than a mobile phone charger, the AE2+ by Aeratron uses superior, rust-proof ABS construction to endure the tough Australian climate.

Features a 19w DC motor that pushes up to 15,032m³/hr*

*60" Variation

Complementary 6-speed remote control with summer/winter function

3 Year In-Home Warranty*

*12 Month Remote & Receiver

Aeratron AE3+ DC

World's Quietest Fan

The multi-award winning tri-blade model was formed through studying the silence and efficiency of birds of prey; not only is the AE3+ range inspired by nature but better for it using 80% less energy than a conventional ceiling fan. The AE3+ design-patented ceiling fan features three smooth self-balancing 3D airfoil blades, paired with an ultra quiet and efficient DC motor that promises silent operation and aerodynamic perfection. Expertly curated by a Swiss-German duo, the revolutionary AE+ range is made to be felt, not heard; runs 15 decibels quieter* than the closest competitor.

*Perceived noise compared to conventional ceiling fans, against the AE+3 model on medium speed

Features a 22w DC motor that pushes up to 15,459m³/hr*

*60° Variation

Complementary 6-speed remote control with summer/winter function

3 Year In-Home Warranty*

*12 Month Remote & Receiver

Overall Best Performer

Aeratron FR DC

Best of Both Worlds

Aeratron's latest innovation, the three-bladed FR harnesses a striking 2D design to deliver the efficiency and performance you have come to expect from the Aeratron brand, at a more conservative price point. The FR ceiling fan features a cost-saving DC motor, three nature-inspired blades and the trailblazing self-balancing blade system. The FR range hosts a higher airflow and sharper appearance than it's AE+ sibling with amazing efficiency.

Features a 26w DC motor that pushes up to 14,067m³/hr*

*60" Variation

Complementary six speed remote control with timer function

Breeze Silent DC

Energy Saving DC Ceiling Fan

Can you hear that? We can't! The powerful yet energy-efficient Breeze Silent is packed with amazing features including an exceptionally quiet and efficient DC motor. The Breeze Silent Ceiling Fan is built with ultra-durable, UV stabilised ABS making it excellent for the harsh Australian climate whether you're installing it indoors or outdoors.

The Breeze Silent DC has a range of great accessories to get the most out of your fan but by far the most exciting is the retrofittable light kit. The light kit available for the Breeze Silent DC range not only has the latest tri-colour tech but also allows the flexibility of changing your mind. Whether you're looking for a high-performance fan in a bedroom or while entertaining in your alfresco area, the ultra-quiet Breeze Silent Ceiling Fan is the perfect fit all year round.

Features a 38w DC motor that pushes up to 15,065m³/hr*

Cloudfan DC

The Smarter Choice

Live the dream with the CloudFan DC. Equipped with smart technology, you can adjust the power, speed, or direction of your ceiling fan based on your local temperature or internal temperature sensor. So, you can ensure your Cloudfan is giving you what you need without lifting a finger.

The Cloudfan was designed here in Australia so you can trust that the ceiling fan was built to endure the harsh Aussie climate. The Cloudfan is a powerful DC ceiling fan that circulates airflow with precision, whisper-silence, and great energy efficiency.

Features a 46w DC motor that pushes up to 18,691m³/hr*

Ceiling Fan *Selection Guide*

Selecting the perfect ceiling fan for your space can improve the value of your home, the amount on your power bill and your quality of life. Based in sunny Brisbane, Calibo specialises in designing and importing a range of on-trend ceiling fans but picking the right fan, we like to go back to basics: styling, features and installation location.

WHAT'S YOUR STYLE?

Making sure your fan matches your vision is an important part of your fan selection journey. With an abundance of finish options, shapes and sizes available, you can ask yourself whether you'd like to go bold with your fan or have it seamlessly blend into the background.

Make it Bold

Interior experts know that the more you can do to draw the eye upward, the bigger the room will feel. With a vast majority of ceilings white, you can make a statement in your space by selecting a black finish or integrating a timber-look blade that is available in most models in our range.

Another way to make your fan more eye-catching is to slightly increase the size of your ceiling fan to make it a little more pronounced.

Make it Blend

By keeping your ceiling fan subdued, you can keep space to ensure other pieces in the room do all the talking. You can promote subtlety by selecting a fan that matches your ceiling colour, mirrors the shapes in your other pieces and is the right size for your space.

WHAT FEATURES ARE IMPORTANT TO YOU?

Thinking about how you'd like to use your ceiling fan can help narrow down the options in your selection process. By understanding certain functionality that is important to you such as smart control, quietness and energy efficiency, you will be able to ensure your ceiling fan ticks all the boxes.

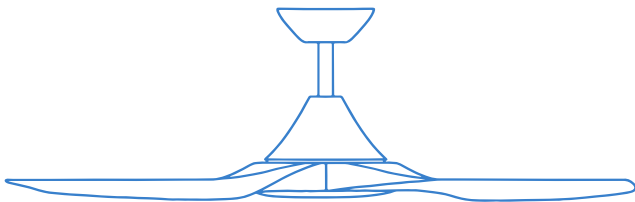

WHERE ARE YOU INSTALLING IT?

In the next handful of pages, we detail our recommendations based on ceiling fan location including the ceiling height and room size.

How high should you hang your *Ceiling Fan?*

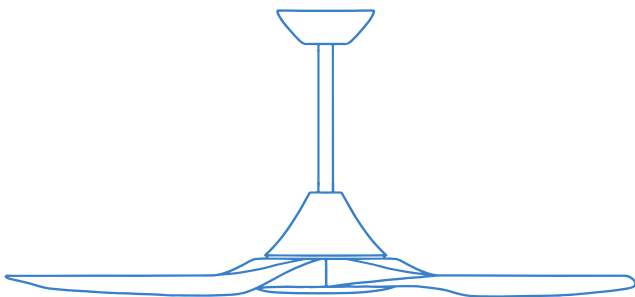

When optimising your ceiling fan for your space you should also consider the height of your ceilings. To maximise performance, comfort and experience, it's recommended that your fan blades should sit 2.4m to 2.7m from the floor.

It's worth noting that for your safety, ceiling fan blades must be at least 2.1m from the floor. Calibo has developed the Profile DC Ceiling Fan specifically for lower ceiling heights, you can find more information on the Profile DC range on page 16.

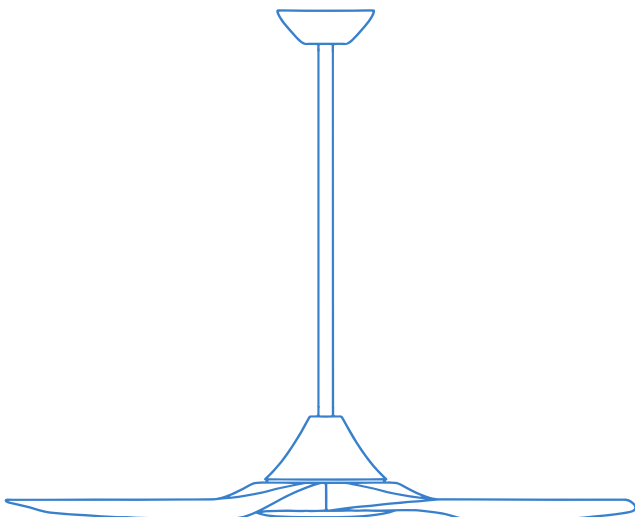

CEILING HEIGHT	LENGTH
2.7M	UP TO 30CM

If your ceiling is between 2.4m and 3m, you will likely be able to use your ceiling fan out of the box. Most ceiling fans on the market are made to perform in these ceiling heights.

CEILING HEIGHT	LENGTH
3.1M	30 - 45CM
3.3M	45 - 60CM
3.7M	60 - 90CM

For a ceiling over 3m but under 4m, your selected fan will work best when paired with a 900mm extension rod accessory.

CEILING HEIGHT	LENGTH
4M	90 - 120CM
4.3M	120 - 150M
4.6M	180CM

Very high ceilings call for longer extension rods. For ceilings over 4m, we'd recommend an 1800mm extension rod accessory. Not all of our range of quality ceiling fans have this length available so check the specific product page for more information.

Choosing the right size Ceiling Fan

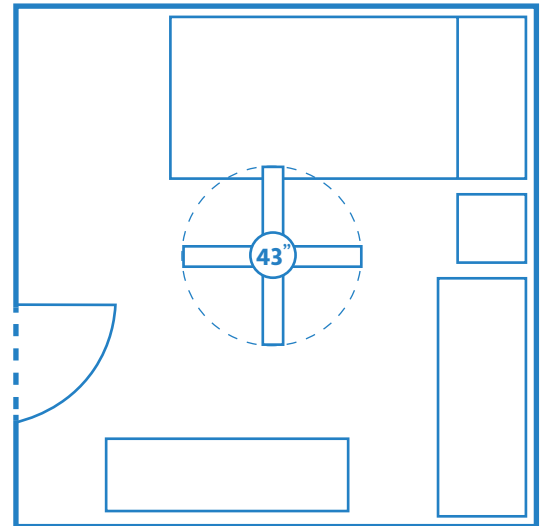

SMALL SPACES

Optimising airflow in smaller spaces like smaller bedrooms with built-ins, home offices, cafes and corner areas can be tricky. For spaces less than 3m x 3m, we recommend a ceiling fan under 43" in diameter to keep the space looking balanced. If you have your heart set on high airflow, depending on the layout of your area, you could opt for a 48".

One of our top tips for ceiling fan selection in smaller spaces is to consider installing a ceiling fan with light. The increased functionality of having a light source on your fan will minimise the requirement for other ceiling lights in your space which may have limited ceiling area.

Recommended Fans:

MODEL	DIAMETER	MAX WATTS	AIRFLOW
Storm DC	42"	26 W	11,129 m ³ /hr
AE2+ DC	43"	20 W	9,962 m ³ /hr
AE3+ DC	43"	20 W	10,340 m ³ /hr
FR DC	43"	18 W	8,600 m ³ /hr

SMALL BEDROOM

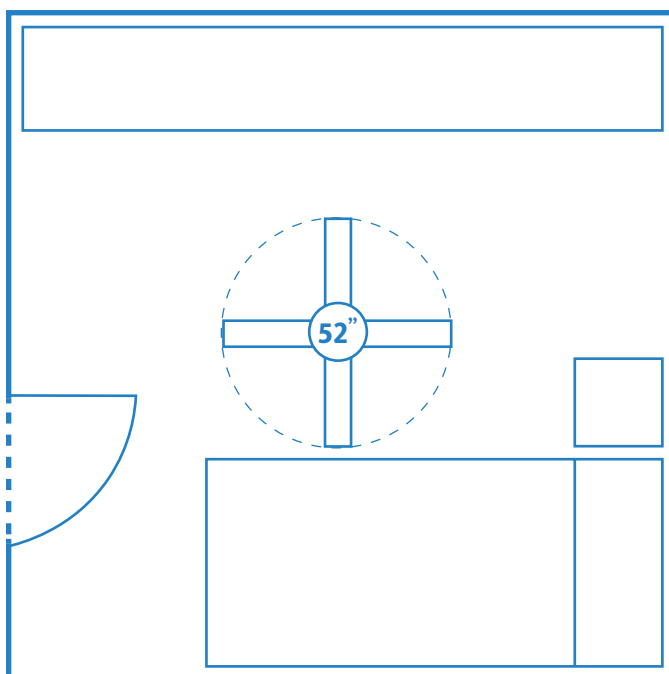

2.5m x 2.5m

MEDIUM SPACES

For spaces between 3mx3m and 4mx4m, we suggest ceiling fans between 48" and 52". Areas like standard-sized bedrooms, media rooms and meeting rooms; depending on your needs and usage, the general rule of thumb is the larger the room, the larger the fan. For example, we would recommend a 48" or 50" fan for a 3m x 3.7m but for a 3.7m x 4m room we'd upgrade to a 52".

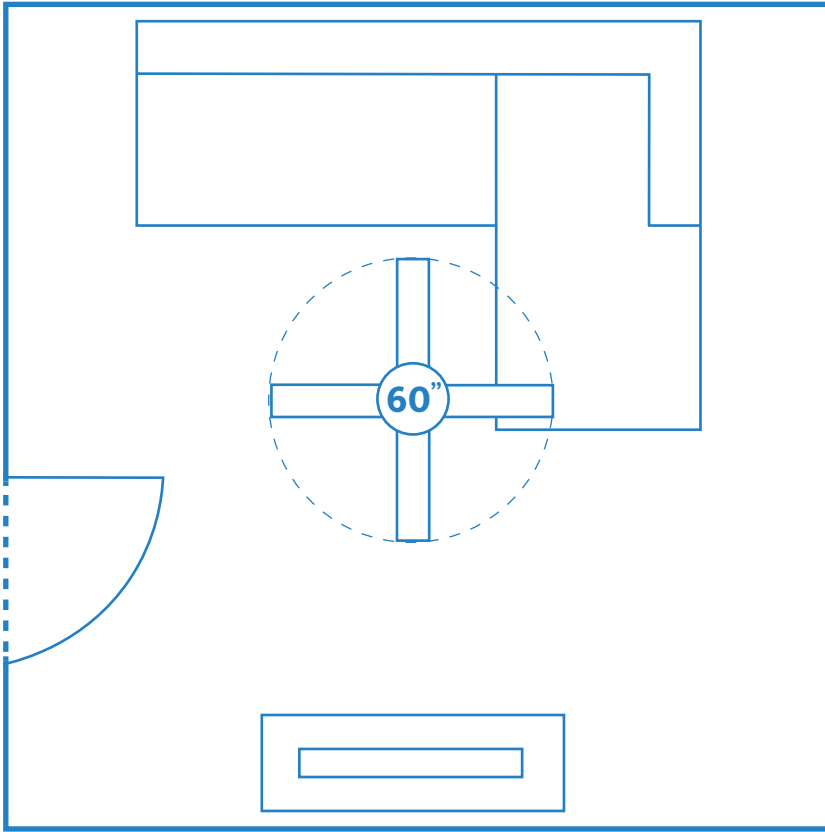

STANDARD BEDROOM

3.2m x 3.2m

Recommended Fans:

MODEL	DIAMETER	MAX WATTS	AIRFLOW
Breeze Silent AC	48"	55 W	13,255 m ³ /hr
Bulimba AC	48"	55 W	10,800 m ³ /hr
Breeze Silent DC	48"	38 W	13,040 m ³ /hr
Activ DC	48"	25 W	13,297 m ³ /hr
Cloudfan DC	48"	30 W	14,667 m ³ /hr
Storm DC	48"	26 W	12,774 m ³ /hr
AE2+ DC	50"	18 W	11,947 m ³ /hr
AE3+ DC	50"	19 W	11,981 m ³ /hr
FR DC	50"	23 W	11,300 m ³ /hr
Profile DC	50"	26 W	12,081 m ³ /hr
Ascot AC	52"	55 W	11,200 m ³ /hr
Breeze Silent AC	52"	55 W	14,310 m ³ /hr
Breeze Silent DC	52"	38 W	15,065 m ³ /hr
Enviro DC	52"	25 W	14,418 m ³ /hr
Activ DC	52"	25 W	13,852 m ³ /hr
Cloudfan DC	52"	36 W	15,351 m ³ /hr
Storm DC	52"	26 W	14,928 m ³ /hr

LIVING ROOM

4.2m x 4.2m

LARGE SPACES

For larger areas like the master bedroom, living areas and dining rooms we suggest fans over 56" in diameter. Ceiling fans generally cool people, not rooms so for spaces over 4m x 4m, consider high traffic and sitting areas when planning the placement of a ceiling fan. For example, in a large lounge, you may want a larger 60" ceiling fan to ensure optimum airflow in the space.

For very large or wide spaces such as open plan living, we recommend multiple well-positioned smaller ceiling fans to guarantee the best airflow in every corner of the space.

Recommended Fans:

MODEL	DIAMETER	MAX WATTS	AIRFLOW
Storm DC	56	26 W	16,003 m ³ /hr
AE2+ DC	60"	19 W	15,032 m ³ /hr
AE3+ DC	60"	22 W	15,459 m ³ /hr
FR DC	60"	26 W	14,067 m ³ /hr
Enviro DC	60"	35 W	15,522 m ³ /hr
Cloudfan DC	60"	46 W	18,691 m ³ /hr

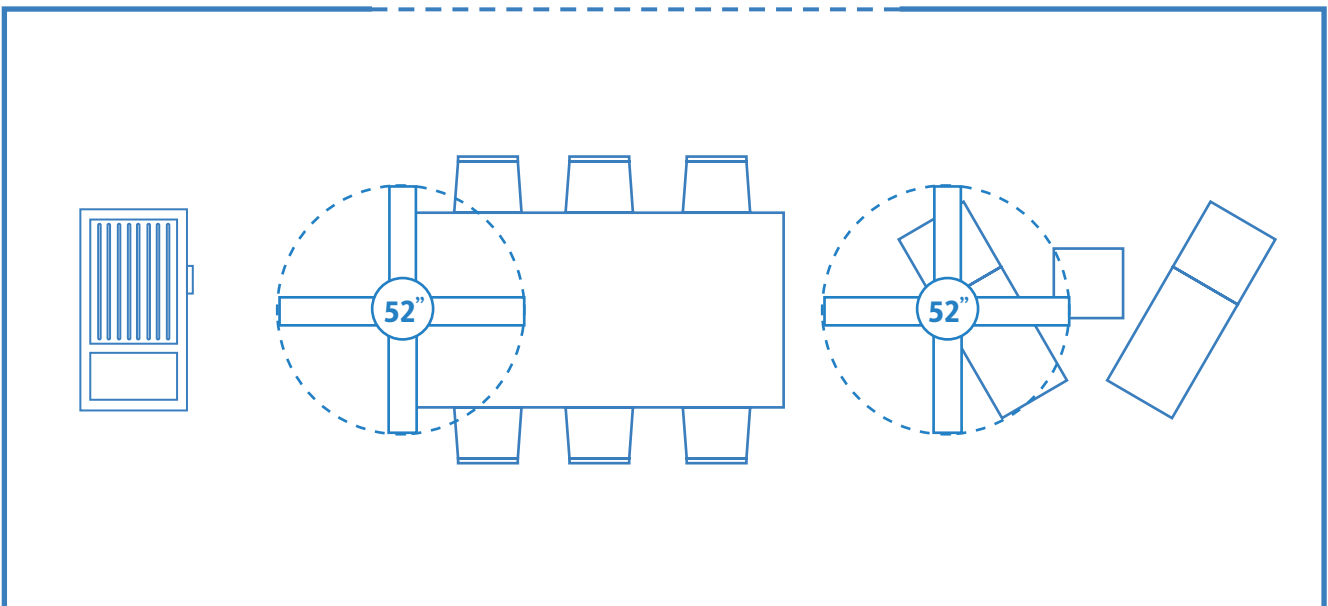

OUTDOOR SPACES

For outdoor areas, we use the same concept as the previous three size examples but you will have the freedom to slightly increase the size of your fan if so desired due to the removal of walls.

When installing a fan in an alfresco area, always check that the ceiling fan you have selected is rated for outdoor use. Check the product page for this information.

ALFRESCO OUTDOOR LIVING AREA

11.5m x 5.5m
