

HydraTarp® 18 Mil Premium Heavy Duty Tarp

DON'T WORRY - WE'VE GOT YOU COVERED!

Our Highest Performance Tarp with 18 mil Thickness and D-Rings Sewn in to the Corners

Rugged Reversible Waterproof Design

Not your typical tarp -- HydraTarps are built to last

We don't cut corners, all HydraTarps are produced with higher cost virgin material. We stay away from cost reduced recycled materials to provide our customers with a product designed to last for many years!

About Watershed Innovations

Watershed Innovations was founded in 2008 with the goal of creating user-friendly products that protect valuable property and land from water damage. Our customers include construction companies, agricultural entities, manufacturing facilities, premiere hotels, the military, and other organizations that have large-scale water protection needs.

No Compromises - We built this HydraTarp as if we will be using it ourselves

Waterproof and Reversible

This is our top of the line tarp, 18 mil thick with D-Rings sewn in to the corners and selectively on the sides. Corrosive free grommets every 18" and UV protective coating applied on both sides, this tarp is built to last.

Thick rope heat sealed edges

We heat seal a thick nylon rope along all the edges of our tarps. This minimizes tarp shearing and tearing as the material wears and adds significant overall strength to the covering. This is not a thin piece of string but a formidable nylon rope.

D-Rings sewn in corners

The corner of a Tarp is the most vulnerable section. Instead of fitting a small rubber piece to the corners, we sew an extra layer of material to each corner adding significant strength. We also sew D-Rings in to all corners for additional strength.

Grommets every 18"

Aluminum Grommets spaced at 18" intervals (instead of 24"). These additional grommets provide more tie down options and spread the stress over a greater area for less stress per grommet.

Not Your Typical Tarp

HydraTarp - Full Length Tarp

Material Specifications

Weight - 10oz per Sq Yd.

Thickness - 18 Mil

Cross Weave 14 x 14

Color - Reversible White/Brown

The HydraTarp Difference

- Double reinforced corners
- Thick Rope Heat Sealed in Edges
- Corrosive free strong Grommets spaced every 18"
- UV Protection on both sides
- 100% Waterproof

18 Mil HydraTarps are Designed for Long Lasting Coverage

Not All Tarps are Created Equal -- Tired of Changing Out Your Tarps Every Year?

Perfect for Roofs!

Need coverage for a thinning or "holy" roof? Say goodbye to disintegrating tarps and get ready for a real tarp that will last for many seasons.

Full Vehicle Coverage

Keep your vehicles undercover and protected throughout the seasons! HydraTarp covers vans, campers, RVs, motorcycles, boats and more when they are not in use!

Keep your Pool Clean!

This waterproof, reversible tarp can be installed with either the White or Brown side facing up. This tarp protects pools from the elements and keeps your swimming area clean!

And many more uses for your home and property!
