

# HydraFill™ Datasheet

The HydraFill™ hose adapter is the easy way to fill your HydraBarrier.

## HydraFill Applications

HydraFill S/U is designed specifically to work with the HydraBarrier Standard and HydraBarrier Ultra. HydraFill G/T is designed specifically to work with the HydraBarrier Supreme and HydraBarrier Titan. Attach one end of the HydraFill to a standard garden hose. Slide the other end of the HydraFill into the opening of the barrier and twist the collar down to lock in place. Turn on the water to hose to fill the barrier. Once the HydraBarriers have been filled and used for their intended purpose, the HydraFill can be re-attached and the barrier drained, via a garden hose, for storage until needed again.

## HydraFill Technical Information

Table 1 – HydraFill Specifications and Order Information

Family Name	Part Number	Weight	Material	Color	Supported HydraBarriers
HydraFill Standard/Ultra	HBF-S/U	6 ounces	PVC	All Blue	HydraBarrier Standard and Ultra
HydraFill Supreme/Titan	HBF-G/T	6 ounces	PVC	Blue & White	HydraBarrier Supreme and Titan

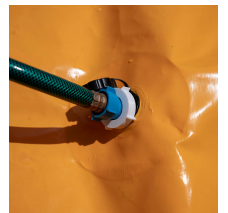

Table 2 – HydraFill Recommended Operating and Storage Conditions

Parameter	Parameter Range (recommended)
Operating Temperature	0°F to 120°F
Storage Temperature	-10°F to 140°F

## HydraFill Connection Recommendations

- Step 1: Attach male end of a standard garden hose to the female end of the HydraFill.
- Step 2: Attach HydraFill to HydraBarrier.
- Step 3: Turn on garden hose water.
