

HydraFill™ Datasheet

The HydraFill™ from Watershed Innovations® is the easy way to fill your HydraBarrier. It's simple to use and can be used to fill or empty a HydraBarrier.

HydraFill Applications

HydraFill is designed specifically to work with the HydraBarrier Standard and HydraBarrier Ultra. Just attach one end to the HydraBarrier and the other end to a standard garden hose. Rather than holding a hose to fill up a HydraBarrier Standard or HydraBarrier Ultra, the HydraFill allows you to attach the hose directly and then stand back while the HydraBarrier fills. Once the HydraBarriers have been filled and used for their intended purpose, the HydraFill can be re-attached and connected to a pump, via a hose, to drain the HydraBarrier.

HydraFill Technical Information

Table 1 - HydraBarrier Standard Specifications and Order Information

Family Name	Part Number	Weight	Material	Supported HydraBarriers
HydraFill	HF-1	6 oz	PVC	Standard and Ultra

Table 2 - HydraFill Recommended Operating and Storage Conditions

Parameter	Parameter Range (recommended)
Operating Temperature	0°F to 120°F
Storage Temperature	-10°F to 140°F (product empty of all liquid contents)

Table 3 - HydraFill Connection Recommendations

- Step 1: Attached male end of a standard garden house to the female end of the HydraFill.
- Step 2: Attach HydraFill to HydraBarrier.
- Step 3: Turn on garden hose water.
