ETC Supplies Premium thread is 100% Rayon embroidery thread that is made from a special high tensile strength rayon filament yarn that is also known as "artificial silk", processed by doubling, twisting and dyeing of the yarn.

This thread is similar to major market leading brands and is a very widely used thread in high-speed embroidery machines both single and multi head.

ETC Supplies Premium thread is a lower cost alternative to major brand threads. It is used for embroidery such as;

- Shirt, lingerie, fashion apparel, children's wear, sports wear, cap, decorative lace, etc. It can ensure the stitches are in consistent performance with little trouble of breaking or fraying, which leads to a higher quality embroidery project.

Available Specifications: 120D/2 (40#) 5000 meter cones and 1000 meter cops.

Tips:

- Top thread tensions should be adjusted for the fabric you are embroidering.
