June Is Prime Planting Season

Many favorite summer vegetables will grow very quickly from seed planted in early summer when the soil is well warmed up and teeming with life. You'll be surprised how fast seeds germinate and explode with growth. Read More

Preorder Saffron Now for Fall Delivery!

Saffron crocus (Crocus sativus) have rich, violet-purple blossoms with brilliant orange-red stigmas that are the source of the aromatic, exotic and pricey (!) spice. Simply air-dry the stigmas from the flowers for your own fresh, first-quality, strained saffron "threads" for cooking. Saffron is easily grown in the garden or containers. Read More

May In The Trial Garden

This season we are evaluating new products including these heavy duty fabric Smart Pots. They are lightweight, easy to move, and come in pretty accent colors. To test them, we are growing the same plants in plastic pots, clay pots and Smart Pots to compare results.

Growing vining varieties means having good sturdy trellises for them to climb, so we are testing growing pole beans and climbing zucchini on this sturdy, lightweight, reusable wide grid trellis. If it works well this season we will offer it to our customers.

Recipe Of The Month

Perfect Green Goddess Dressing

This full flavored, creamy, herby dressing goes beautifully with crisp lettuce. Add some cooked chicken or fish for a whole meal! One of Renee's personal favorites! View Recipe
