## Tsurumi POMA Submersible Automatic Sump Pump

The POMA automatic water pump is ideal for use in sumps and chambers for a wide range of applications across domestic and industrial jobs. It has been especially popular with processing and cellar duties.

The POMA pump is fully submersible and has highly energy efficient 150-watt motor which produces a large flow. This is a pump that is popular with water companies because of its capability to handle solids, its superior level control along with its high dependability.

If you need a reliable water pump to use in narrow chambers or sumps, the POMA is particularly suited to this application due to its tube float switch. This works so much better than in cases where traditional float switches have been used and failed.

The impeller on the POMA pump enables generous suspended soft solids handling, whilst the shaft is constructed with stainless steel and is firmly fitted with a durable and long-lasting mechanical seal.

The POMA pump comes with 10m of heavy duty power cable.

Model	POMA Industrial	POMA Domestic
Manual/ Auto	A	A
Outlet/ mm	2"	50
kW	0.15	0.15
Volt	110/230	230
Flow Ltr/ min	250	250
Head/ m	5.5	5.5
On Level/ mm	285	285
Off Level/ mm	100	100
Free Passage/ mm	35	35
W x L x H/ mm	197x225x354	197x225x354
Weight/ Kg	6.6	6.6

### Suitable for:

- Basement Drainage
- Flooding - Submersible
- Industry
- Utilities
- Basements
- Processing
- Final effluent
