## Umbrapompe Acuabig Submersible Well Borehole Pump

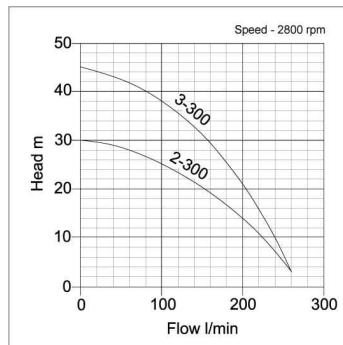

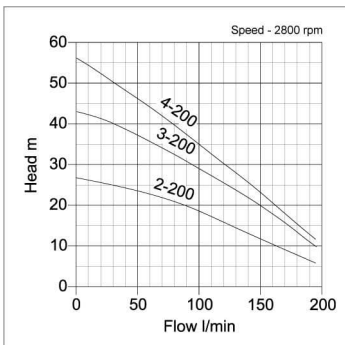

If you're looking for a bore-hole, multi-stage pump, then this range of ACUABIG pumps from Umbrapompe could be the ideal solution. If a large flow rate is required, at high pressures, this series has a number of options available for use predominantly within irrigation, spraying, processing, agriculture and potable water applications.

The body of the pump is made with 304 stainless steel, there are Noryl impellers and diffusers. Additionally, the pump stages are also fitted with rings made from 304 stainless steel for additional resistance to wear.

The pumps in this series feature starting capacitors and integral motor protection, these allow for a quick and straightforward installation.

Each of the ACUABIG pumps come with a 20m heavy-duty rubber power cable as standard. They are available to purchase with or without a float switch. On the manual version, which has no float switch, it is still possible to control these by using a pressure controller in the delivery line.

The different models in the ACUABIG pump series are all offered with a manual and automatic variant. Each of these pumps has 5" bore hole size.

- Suitable for:**
- Well / Boreholes
  - Industry
  - Agriculture
  - Irrigation
  - Portable water
  - Spraying
  - Processing
