Step 3: Now you can see your **Installation ID**. You will need these numbers to obtain your **Confirmation ID**, which is required to finish the activation of your product. So keep the window open and do the following:

Choose the phone number that is shown for your country,

Now you are ready to activate your product.

Start by calling your chosen number.

Now press option 1 to consent to call recording.

Enter the auto generated security number if asked on the telephone keypad.

Now press option 3, do <u>NOT</u> press option 2, this will fail activation.

Now press option 1.

Microsoft will now ask for your Installation ID, type it into your telephone keypad <u>carefully</u>.

You will now be asked how many devices was this key used, press 0. (The reason we choose 0 as you have not activated this on any PC yet)

The automated system will now verify your <u>Installation ID</u> and generate <u>Confirmation ID</u> for you.

Type the Confirmation ID into your activation menu carefully and press next.

Your activation is successful and fully installed on your PC now press option 2 on your telephone keypad to complete the activation.
